Kyrkbänken Bench

Design White Arkitekter

These wooden benches were designed to provide contemporary outdoor seating for public space developments. Designed with timelessness in mind, the benches were crafted with elegance and simplicity. The benches are made in three heights which can be combined to create unique seating arrangements.

Dimensions and weight	Length: 140,5 cm Width: 50 cm Height: 35 / 45 / 55 cm Individual dimensions The steel plate in the frame: 5 mm thick Wood components: 40 mm x 92 mm.
Product numbers and combinations	Ö50-00LG Bänk Kyrkbänken låg, höjd 35 cm. Ö50-00MG Bänk Kyrkbänken mellan, höjd 45 cm. Ö50-00HG Bänk Kyrkbänken hög, höjd 55 cm. Append to product number WOOD AND FINISH RAL 7047 C for any color other than standard, starting cost is added.
	METAL SURFACE FINISH RAL 7047 C for any color other than standard, starting cost is added. INSTALLATION TYPE N for surface mount.
Standard colours	RAL 7047
Materials and surface treatments	Pine Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces. Steel Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.
	Powder coating Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.
	Electrogalvanized Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.
	Water-based glaze Varnishing of wood is done with a water-based varnish. A water-based paint that is kinder to the environment. Under normal use, the paint has a good wear resistance and long durability.

Assembly and placement	Surface mount Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included. Fully assembled.
Maintenance	Powdercoated steel Products that are powder-coated can be touch-up painted with alkyd paint.
	Water-based glazed pine Products in varnished pine must be maintained regularly with alkyd paint. Maintenance intervals approximately 1 time per year. Damage and cracks should be repaired immediately. Touch-up paints in spray packaging are available in standard colors to order. Read more in our general maintenance advice at nola.se/en/care-and- maintenance
Versions	The low version is 35 cm high. The medium version is 45 cm high. The high version is 55 cm high.
