Sigill Park Bench

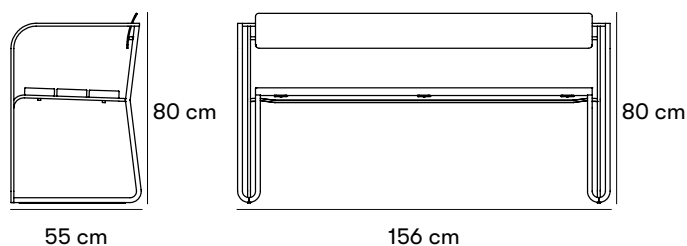

Design Gunilla Allard & Note Design Studio

Sigill is a park bench for the future that builds on the design styles of the past. The design is unique in its broken surface that angles two parts of the seat towards each other. The bench's contemporary shape gives it an urban context, making it ideal for street furniture. The ease with which Sigill can be moved, stacked and stored makes it a popular choice for summer terraces, outdoor concert venues and open-air services.

Can be treated with Protega Novatherm fire protection, which is a waterborne fire protection paint, for products which, for example, will be placed in connection with escape routes and entrances.

 Designed for accessibility

 Can be treated with fire protection

Dimensions and weight

Length: Rak soffa 156 cm. Vinklad soffa 226cm

Height: 80 cm

Armrest height: 75 cm

Sitting height: 48 cm

Depth: Rak soffa 55 cm. Vinklad soffa 85 cm

Sigill straight:

Height: 80 cm

Width: 156 cm

Depth: 55 cm

Weight: 46 kg

Sigill angled:

Height: 80 cm

Total width: 226 cm

Total depth: 85 cm

Weight: 66 kg

Product numbers and combinations

U40-01 Sigill backed bench, straight

U40-02 Sigill backed bench, angled

U40-03 Sigill backed bench, double

U40-04 Sigill bench

U40-04A Sigill bench with armrests

U40-05 Sigill double bench

U40-05A Sigill double bench, with armrests

WOOD AND FINISH

EK for oiled oak.

GR for top-glazed pine green RAL 6020.

C for top-glazed pine in any color, at additional cost.

METAL SURFACE FINISH

GR for powder coated green RAL 6020.

S for electro-galvanized and powder-coated steel black Noir 2200 Sablé.

C for electro-galvanized and powder-coated steel in any color, at additional cost.

VFZ for hot dip galvanized only.

VARIANTS

Can be treated with fire protection, at additional cost.
For fire protection treatment contact Nola.

INSTALLATION TYPE

N for surface mount.

Standard colours

-  RAL 6020
-  Noir 2200 Sablé
-  Hot-dip galvanized steel

Materials and surface treatments

Wood:

E for oiled oak

GR for cover glazed pine green RAL 6020

C for cover-glazed pine in any color, at an additional cost

Steel:

GR for powder coated green RAL 6020

S for powder coated black Noir 2200 Sablé

C for powder coated in any color, at an additional cost

VFZ for hot-dip galvanized only

Pine

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

Oak

Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable in case of moisture changes. Oak wood blackens if it is exposed to moisture or wetness for a long time. However, it does not affect the other properties of the wood. Thanks to its hardness and toughness, the oak wood is suitable for furniture and other use in exposed environments.

Wood oil

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

Water-based glaze

Varnishing of wood is done with a water-based varnish. A water-based paint that is kinder to the environment. Under normal use, the paint has a good wear resistance and long durability.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Hot-dip galvanized or electrogalvanized and powder coating

Available in either only hot-dip galvanized steel or electro-galvanized and powder-coated steel.

Hot-dip galvanizing provides very strong protection against corrosion. The steel is dipped into a bath of hot liquid zinc. The zinc attaches and creates a surface coating on the steel part, which is then taken out of the bath and drained of excess zinc.

Electrogalvanizing provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current. Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Supplied fully assembled.

Maintenance

Oiled oak

Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil.

Water-based glazed pine

Products in varnished pine must be maintained regularly with alkyd paint. Maintenance intervals approximately 1 time per year. Damage and cracks should be repaired immediately. Touch-up paints in spray packaging are available in standard colors to order.

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.

Hot dip galvanized steel

Hot-dip galvanized can be touch-up painted with so-called "cold galvanizing".

[Read more in our general maintenance advice at nola.se/en/care-and-maintenance](https://nola.se/en/care-and-maintenance)

Versions

Available in a straight or angled version or in hot-dip galvanized only.

Character

A unique park bench, stackable in two designs. High-quality production, materials and design.

Designers

Gunilla Allard

Gunilla Allard is a Swedish designer, interior architect and scenographer. She graduated from the University College of Arts, Crafts and Design (Konstfack) in 1988 where she studied interior architecture, and after attended Det Kongelige Danske Kunstakademi in Copenhagen where she studied art. She found her interest for design while working as a scenographer for movies such as Fanny and Alexander and The Glassblower's children. In 1989 she started designing furniture for Lammhults and has since then created several famous furniture for Lammhult as well as other brands. In 2000 she was awarded with the Bruno Mathsson prize.

Note Design Studio

Note is a design studio based in Stockholm. The studio was founded in 2008 and has since worked in a variety of fields including architecture, interior, product & graphic design as well as design strategy. Note has throughout the years been awarded with numerous prizes and awards, including Wallpaper* Best Design Award 2018, designer of the year 2016 by Elle Decoration and designer of the year 2015 by Residence magazine.

Sigill is available in a straight or, as here, an angled version. Frame powder-coated with a fine textured varnish.
