Gro Planter

Design Mia Cullin

Gro celebrates the beauty of nature, making it possible to bring climbing plants, vines and creepers into any environments. The planter is fitted with climbing frames shaped like an arc. Several planters can be placed in a row to create an attractive screen or provide a stylish means of dividing space. Rollers integrated into the base make Gro planters easy to move. Despite its substantial size, the planter can glide from one space to another.

Dimensions and weight

Length: 100 cm
Width: 40 cm
Height: 152 cm
Weight 64 kg

Planting depth: 25 cm Length including pedal: 112,5 cm
Volume: 98 L

Product numbers and combinations

Ö16-08 Gro planter with integrated glider wheels
Ö16-08BT7 Mona irrigation tank, holds 5.9 litres
Ö16-08/1 Rubber waterproof liner, fits inside the planter
B11-06 Additional fee for non-standard colour

METAL SURFACE FINISH

C for any color other than standard, starting cost is added.

Standard colours

 RAL 3007
 RAL 6020
 RAL 160 70 10
 Ivoire Blanche

Materials and surface treatments

RAL 3007 finstruktur.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Pre-assembled before delivery.

Freestanding. Rollers are integrated into the base, making it easy to move the product. The rollers can be locked to keep the planter in place.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
