Harads Box

Design Bertil Harström & Johan Kauppi

Harads Box is a robust, sturdy shelter that frames green spaces and provides a contemporary focal point. Harads Box is part of the Harads furniture series, a unique system of interactive seating, surfaces and shelter. Each product is designed to combine with others in the system to create original configurations. The box, along with the other products in the series, are crafted from sustainably-managed timber and fitted with adjustable steel feet.

CERTIFICATION

Dimensions and weight

Length: 238 cm
Width: 160cm
Height: 252 cm

Product numbers and combinations

U25-06 Harads box
B11-06 Additional fee for choice of non-standard colours

Append to product number

METAL SURFACE FINISH

C for any color other than standard, starting cost is added.

INSTALLATION TYPE

N for surface mount.

M for installation in pre-cast foundations.

Standard colours

RAL 1023

Materials and surface treatments

Sioo-treated pine and glulam wood. The steel parts are zinc-plated and powdercoated in RAL 1023. Other colours are available at an additional cost.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Zinc powder primer

It's a thermosetting epoxy powder coating primer that can be applied on several type of metal substrates such as aluminium, steel or galvanised steel. This primer has a robust curing window, allowing excellent inter coat adhesion in direct fired ovens and gives very good edge coverage and superior corrosion protection.

SiOO:X treatment

Sioo:x is a wood protection with environmentally friendly silicon technology. Water-based and biocide-free. We use Sioo mainly for our oak furniture. Sioo:x treatment of is suitable for all woods, outside as well as inside, and gives a light surface without pigments. The surface is UV-resistant, water-repellent and non-stick. Active and preventive action against algae, mould and pests. Also rot-proof, wood-strengthening and fire-retardant. This wood protection provides long durability and easy maintenance.

Spruce

Spruce is one of the most common trees in the Nordic region. Its wood is usually softer than that of pine and it is generally less rot-resistant. Due to its straight stem and fine branching, spruce usually produces timber of good quality and is one of the most common tree species in the production of sawn building timber.

Assembly and placement

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Installation in pre-cast foundations

Posts for installation in pre-cast foundations.

Fully assembled.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.

SiOO:X treatment on coniferous wood

Sioo:x-treated products are treated twice upon delivery; once with a wood protection (Premium Träskydd Altan) and once with a surface protection (Premium Ytskydd Altan). Directly after a product has been installed, it should be treated once more with Sioo:x Premium Surface Protection Altan for best durability. After that, every 12 months. The surface protection forms a wear surface, which means that products that are exposed to severe mechanical wear may need to be treated more often than every ten years. The surface treatment has a tested effect according to the standards EN 46 and EN 113.

For information about the Sioo treatment see the website www.sioox.se.

Versions

The box can be complemented by a sun deck, planter-bench, bench or table in the Harads series.

Character

The box is part of a unique, robust furniture group that provides shelter, shade and seating as it creates a contemporary focal point.

Bertil Harström

Johan Kauppi

Johan is part of the designer duo *Kauppi & Kauppi*, with roots in the very north and south of Sweden. The design studio approaches design in all scales, from spatial projects to tactile objects in the hand's scale. Kauppi & Kauppi has received several honorable design awards such as *Swedish Design Awards*, *Archiproduct Design Awards*, *Muuuz International Design Awards*, *iF Design Award* and a handful of *German Design Awards*, to mention some of the studio's highlights.
