LowBed Bench

Design Mats Aldén

The Low Bed is a spacious design made with a tilted seat and backrest that encourage the user to sit back and unwind. Designed to promote relaxation, these designs are a perfect choice for poolside patios, outdoor terraces and beachfront balconies. Whether arranged as a group or presented individually, the Low/High products bring high design to almost any setting.

Can be treated with Protega Novatherm fire protection, which is a waterborne fire protection paint, for products which, for example, will be placed in connection with escape routes and entrances.

Can be treated with fire protection

Dimensions and weight

Length: 202 cm
 Width: 62 cm
 Height: 90 cm
 Sitting height: 35 cm
 Overall height: 89.6 cm

Product numbers and combinations

U11-58 LowBed sun lounger
 B11-05 Additional fee for choice of non-standard wood
 B11-06 Additional fee for choice of non-standard colour

Append to product number

WOOD AND FINISH

EK for oiled oak.

METAL SURFACE FINISH

GR for gray Gris 2150 Sablé.

V for white RAL 9010.

C for any color of steel, at an additional cost. Choose a RAL colour.

VARIANTS

Can be treated with fire protection, at additional cost.

For fire protection treatment contact Nola.

INSTALLATION TYPE

N for surface mount.

Standard colours

 RAL 9010
 Gris 2150 Sablé

Materials and surface treatments

Oak

Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable in case of moisture changes. Oak wood blackens if it is exposed to moisture or wetness for a long time. However, it does not affect the other properties of the wood. Thanks to its hardness and toughness, the oak wood is suitable for furniture and other use in exposed environments.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Wood oil

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

The product is delivered fully assembled.

Maintenance

Oiled oak

Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil.

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
