A3 A4 A5 Litterbin

Design TAF Studio

These paper recycling bins make sorting simple and neat. Sized to contain sheets of A4 paper and stack them, the bins make it easier to re-feed the paper directly into a printer tray later on, or bundle it neatly for recycling. The bins enable any office to maintain a reliable secondary source of A4 paper. With the money saved on replacing wasted sheets of A4, the bins quickly pay for themselves.

CERTIFICATION

Dimensions and weight

A3 Bin Length: 55 cm Width: 33 cm Height: 55 cm Weight: 8.5 kg Volume: 70 liters.

Append to product number

METAL SURFACE FINISH

S for black RAL 9017.

V for white RAL 9016.

C for any color other than standard, initial cost is added.

Standard colours

 RAL 9017
 RAL 9016

Materials and surface treatments

Made in bent sheet steel powder-coated in standard colours black RAL 9017 or white RAL 9016.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding
Freestanding product that is placed directly on the ground.

Maintenance

Powdercoated steel
Products that are powder-coated can be touch-up painted with alkyd paint.
