Angle – New Product! Planter

Design Synnöve Mork

Angle enables a modern reinterpretation of a baroque garden, if one desires, with its angles and varying heights in various perspectives. With three different sizes and volumes, Angle is like an architectural puzzle with nearly limitless possibilities. Together, the parts can create the most imaginative formations. Angle can be placed as sections or create spatial divisions in places such as parks, courtyards, or urban landscapes. The different heights allow for varied vegetation, from shrubs to small trees. For inspiration for furnishing Angle Planters, see Furnishing suggestions below.

Dimensions and weight

Ö16-76 Large Planter

Length: 140 cm.

Width: Total: 140 cm. Wing: 70 cm.

Diagonal: Length: 197 cm. Width: 148 cm.

Height: 90 cm.

Planter Volume: 1000 Liter.

Weight: 285 kg.

Ö16-77 Medium Planter

Length: 120 cm.

Width: Total: 120 cm. Wing: 60 cm.

Diagonal: Length: 169 cm. Width: 127 cm.

Height: 67,5 cm.

Planter Volume: 550 Liter.

Weight: 192 kg.

Ö16-78 Small Planter

Length: 100 cm.

Width: Total: 100 cm. Wing: 50 cm.

Diagonal: Length: 141 cm. Width: 106 cm.

Height: 45 cm.

Planter Volume: 300 Liter.

Weight: 73 kg.

	RAL 6033
	RAL 6025
	RAL 6028
	RAL 3013
	RAL 5020
	RAL 2002
	RAL 5021
	RAL 7044
	RAL 7048
	RAL 1000

Materials and surface treatments

Lilla och mellan planteringskärl är tillverkad i 3 mm plåt.
Stora planteringskärlen är tillverkad i 4 mm plåt.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Zinc powder primer

It's a thermosetting epoxy powder coating primer that can be applied on several type of metal substrates such as aluminium, steel or galvanised steel. This primer has a robust curing window, allowing excellent inter coat adhesion in direct fired ovens and gives very good edge coverage and superior corrosion protection.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

All planters are equipped with internal loops for easier handling. The planters are equipped with adjustable feet to be able to level the ground slope.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.

[Read more in our general maintenance advice at nola.se/en/care-and-maintenance](https://nola.se/en/care-and-maintenance)

Versions

As standard, the planters are drained at the bottom to cope with outdoors. If the planters are to be used indoors, this needs to be specified when ordering to get a closed bottom.

Designers

Synnöve Mork

Synnöve Mork showcases a diverse range of creative expressions through her work in design, interior decoration, and exhibition architecture, with textiles being a prominent element. She is renowned for her graphic patterns featuring stripes and squares, which is evident in the Angle planters, her first product for Nola.
