## Picnic Table, Steel version

### Design Nola

This picnic classic combines tables and seating in a single design, providing a practical alternative to tables and chairs. This version is made with a steel frame that supports the seats and tabletop from underneath. The frame is open at each end, providing gaps that make it easy to slide in. This makes the picnic table more accessible for those who may be less able. Each end of the table has an overhang, providing access for wheelchair users.

#### CERTIFICATION

#### FEATURES

-  Designed for accessibility
-  Suitable for preschools and playgrounds

#### Dimensions and weight

Length: 140, 180, 230 cm (rullstolsanpassat) och 234 cm  
Width: Bordsskiva 75 cm  
Height: 79 cm  
Sitting height: 50 cm  
Sitting depth: 29,5 cm  
Depth: 155 cm

Length: 180 cm  
Width: 75 cm  
Tabletop height: 79 cm  
Seat height: 49 cm

#### Picnic Table Steel, child version

Length: 140, 180 eller 234 cm  
Width: bord 75 cm  
Height: 60 cm  
Sitting height: 32 cm  
Sitting depth: 29,5 cm  
Depth: 155 cm

Length: 180 cm  
Width: 75 cm  
Tabletop height: 79 cm  
Seat height: 49 cm

## Product numbers and combinations

U02-09 Bänkbord Stål, Picnic Table, Steel version, 140 cm  
U02-07 Bänkbord Stål, Picnic Table, Steel version, 180 cm  
U02-09/RULL Bänkbord Stål, Picnic Table, Steel version, wheelchair accessible. Tabletop length 230 cm, bench length 180 cm.  
U02-10 Bänkbord Stål, Picnic Table, Steel version, 234 cm  
U07-42 Attachment hardware, set of 4 pieces  
B11-06 Startup cost for powder coating steel in a color other than standard. Choose a RAL colour.

U02-09/B Bänkbord Stål Barn, Childs Picnic Table, Steel version, 140 cm  
U02-07/B Bänkbord Stål Barn, Childs Picnic Table, Steel version, 180 cm  
U02-10/B Bänkbord Stål Barn, Childs Picnic Table, Steel version, 234 cm  
U07-42 Attachment hardware, set of 4 pieces  
B11-06 Startup cost for powder coating steel in a color other than standard. Choose a RAL colour.

### Append to product number

#### WOOD AND FINISH

LIN for linax impregnated pine.

#### METAL SURFACE FINISH

P for electro-galvanized and powder-coated stand in 9005.  
If you do not specify P, you get a stand that is only hot-dip galvanized.  
C for any color of steel, at an additional cost.

#### INSTALLATION TYPE

N for surface mount.

## Standard colours

 RAL 9005  
 Hot-dip galvanized steel  
 Linax impregnated pine

## Materials and surface treatments

Ny modell!  
Material 34x145 fem brädor på bordet i stället för sex brädor.

Ny sitsbredd 295 mm i stället för 230 mm.

### Pine

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

### Linax

Linax is a linseed oil-based impregnation that provides extra long durability in outdoor environments and corresponds to impregnation class AB. The impregnated wood turns gray over time, which means that it should be re-oiled if necessary. Use a linseed-based oil for impregnated materials.

After traditional impregnation according to NTR AB, the wood is boiled in a hot linseed oil with or without color pigments under vacuum. The oil is penetrated into the surface on all six sides, which reduces moisture absorption in the wood and gives a dimensionally stable product over time. The result is a dried product with good resistance to rot that also has long maintenance intervals. Linax-impregnated furniture is intended for outdoor environments only.

#### **Steel**

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

#### **Hot-dip galvanized or electrogalvanized and powder coating**

Available in either only hot-dip galvanized steel or electro-galvanized and powder-coated steel.

Hot-dip galvanizing provides very strong protection against corrosion. The steel is dipped into a bath of hot liquid zinc. The zinc attaches and creates a surface coating on the steel part, which is then taken out of the bath and drained of excess zinc.

Electrogalvanizing provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current. Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

### **Assembly and placement**

#### **Freestanding**

Freestanding product that is placed directly on the ground.

#### **Surface mount**

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Delivered in pre-assembled sections ready to be assembled on site. The product is completely freestanding.

### **Maintenance**

#### **Linax impregnated pine**

Outdoor furniture requires oiling every 5 years and panel products and roofs require oiling every 12 years. Maintenance should be done with linseed oil varnish. It is important that the wood is clean and dry (max. 20% moisture content) before it is finished with oil. When washing, do not use high-pressure cleaners. Washing should be done with lukewarm water and then rinsed off with a water hose at normal pressure. Strong grease-dissolving agents should not be used, but washing should be done with a mild household detergent. Detergents containing bleach should also not be used.

The oil can be applied with a roller or brush. Too much oil can cause growth on the wood and give a sticky surface. Attacks by growth can also occur if the wood has not been sufficiently dry or cleaned before the oil is applied. Growth does not damage the wood and is relatively easy to remove, but has a tendency to return.

**Powdercoated steel**

Products that are powder-coated can be touch-up painted with alkyd paint.

**Hot dip galvanized steel**

Hot-dip galvanized can be touch-up painted with so-called "cold galvanizing".
