Picnic Table Steel, child version

Design Nola

This picnic classic combines tables and seating in a single design, providing a practical alternative to tables and chairs. This version is made with a steel frame that supports the seats and tabletop from underneath. The frame is open at each end, providing gaps that make it easy to slide in. This makes the picnic table more accessible for those who may be less able. Each end of the table has an overhang, providing access for wheelchair users.

FEATURES

 Designed for accessibility

 Suitable for preschools and playgrounds

CERTIFICATION

 **SundaHus**

Dimensions and weight

Length: 140, 180 eller 234 cm
Width: bord 75 cm
Height: 60 cm
Sitting height: 32 cm
Sitting depth: 29,5 cm
Depth: 155 cm

Length: 180 cm
Width: 75 cm
Tabletop height: 79 cm
Seat height: 49 cm

Tabletop length 230 cm, bench length 180 cm.
U02-10 Bänkbord Stål, Picnic Table, Steel version, 234 cm
U07-42 Attachment hardware, set of 4 pieces
B11-06 Startup cost for powder coating steel in a color other than standard.
Choose a RAL colour.

Append to product number

WOOD AND FINISH

LIN for linax impregnated pine.

METAL SURFACE FINISH

P for electro-galvanised and powder-coated stand in RAL 9005.

If you do not specify P, you get a stand that is only hot-dip galvanized.

C for any color of steel, at an additional cost.

VARIANTS

Bench table for children wheelchair accessible is not available as standard.

Contact us at Nola if you want to order this.

INSTALLATION TYPE

N for surface mount.

Standard colours

RAL 9005

Hot-dip galvanized steel

Linax impregnated pine

Materials and surface treatments

Pine

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

Linax

Linax is a linseed oil-based impregnation that provides extra long durability in outdoor environments and corresponds to impregnation class AB. The impregnated wood turns gray over time, which means that it should be re-oiled if necessary. Use a linseed-based oil for impregnated materials.

After traditional impregnation according to NTR AB, the wood is boiled in a hot linseed oil with or without color pigments under vacuum. The oil is penetrated into the surface on all six sides, which reduces moisture absorption in the wood and gives a dimensionally stable product over time. The result is a dried product with good resistance to rot that also has long maintenance intervals. Linax-impregnated furniture is intended for outdoor environments only.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Hot-dip galvanized or electrogalvanized and powder coating

Available in either only hot-dip galvanized steel or electro-galvanized and powder-coated steel.

Hot-dip galvanizing provides very strong protection against corrosion. The steel is dipped into a bath of hot liquid zinc. The zinc attaches and creates a surface coating on the steel part, which is then taken out of the bath and drained of excess zinc.

Electrogalvanizing provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current. Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Delivered in pre-assembled sections ready to be assembled on site. The product is completely freestanding.

Maintenance

Linax impregnated pine

Outdoor furniture requires oiling every 5 years and panel products and roofs require oiling every 12 years. Maintenance should be done with linseed oil varnish. It is important that the wood is clean and dry (max. 20% moisture content) before it is finished with oil. When washing, do not use high-pressure cleaners. Washing should be done with lukewarm water and then rinsed off with a water hose at normal pressure. Strong grease-dissolving agents should not be used, but washing should be done with a mild household detergent. Detergents containing bleach should also not be used.

The oil can be applied with a roller or brush. Too much oil can cause growth on the wood and give a sticky surface. Attacks by growth can also occur if the wood has not been sufficiently dry or cleaned before the oil is applied. Growth does not damage the wood and is relatively easy to remove, but has a tendency to return.

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.

Hot dip galvanized steel

Hot-dip galvanized can be touch-up painted with so-called "cold galvanizing".
