Basking – New Product!

Sun Sofa and footrest

Design Thomas Bernstrand

Basking is a sun lounger with a freestanding footrest, offering excellent accessibility that makes it easy for everyone to sit comfortably. The piece presents a sleek and refined aesthetic with carefully crafted details. Its robust construction is supported by smooth aluminum sides combined with warm wooden slats, creating a restful seating experience—ideally positioned to face the sun.

Dimensions and weight

U16-63 Sun sofa

Width: 186 cm

Depth: 71 cm

Height: 89 cm

Seat height: 40 cm

Weight: 61 kg

U16-63/FOT Footrest

Width: 186 cm

Depth: 30 cm

Height: 40 cm

Weight: 21 kg

WOOD AND FINISH

LIN for linax impregnated pine.

METAL SURFACE FINISH

C for a different color other than standard, start-up cost is added.

Standard colours

RAL 6004

Linax impregnated pine

Materials and surface treatments

Aluminium

Aluminum is a soft light metal that is silvery to gray in color. Depending on the alloy, aluminum usually has good corrosion resistance. It is common for the aluminum to be extruded into tubes or rolled into a plate in the desired material thickness.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Pine

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

Linax

Linax is a linseed oil-based impregnation that provides extra long durability in outdoor environments and corresponds to impregnation class AB. The impregnated wood turns gray over time, which means that it should be re-oiled if necessary. Use a linseed-based oil for impregnated materials.

After traditional impregnation according to NTR AB, the wood is boiled in a hot linseed oil with or without color pigments under vacuum. The oil is penetrated into the surface on all six sides, which reduces moisture absorption in the wood and gives a dimensionally stable product over time. The result is a dried product with good resistance to rot that also has long maintenance intervals. Linax-impregnated furniture is intended for outdoor environments only.

Maintenance

Powder coated Aluminium

Products that are powder-coated can be touch-up painted with alkyd paint if necessary.

Linax impregnated pine

Outdoor furniture requires oiling every 5 years and panel products and roofs require oiling every 12 years. Maintenance should be done with linseed oil varnish. It is important that the wood is clean and dry (max. 20% moisture content) before it is finished with oil. When washing, do not use high-pressure cleaners. Washing should be done with lukewarm water and then rinsed off with a water hose at normal pressure. Strong grease-dissolving agents should not be used, but washing should be done with a mild household detergent. Detergents containing bleach should also not be used.

The oil can be applied with a roller or brush. Too much oil can cause growth on the wood and give a sticky surface. Attacks by growth can also occur if the wood has not been sufficiently dry or cleaned before the oil is applied. Growth does not damage the wood and is relatively easy to remove, but has a tendency to return.
