## Bollnäs Table

**Design Thomas Bernstrand**

Bollnäs round table comes in two sizes and has a sturdy metal frame with robust wooden parts. The low, round table is suitable for small children.

#### Dimensions and weight

##### Table

Height: 72 cm

Diameter: Ø 67 cm

##### Child table

Height: 52 cm

Diameter: Ø 45 cm

#### Product numbers and combinations

Ö19-53/67 Bollnäs table

Ö19-54/45 Bollnäs child's table

B11-06 Startup cost for powder coating steel in a color other than standard.

Choose a RAL colour.

#### Append to product number

##### WOOD AND FINISH

LIN for linax impregnated pine.

##### METAL SURFACE FINISH

RAL 1023 for powder coated steel (yellow)

RAL 2002 for powder coated steel (red)

Gris 2900 Sablé for powder coated steel (grey)

C for any color other than standard, starting cost is added.

##### INSTALLATION TYPE

N for surface mount.

M for in-ground.

#### Standard colours

	RAL 2002
	RAL 1023
	Gris 2900 Sablé
	Linax impregnated pine

#### Materials and surface treatments

Glulam.

##### Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

### **Electrogalvanized**

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

### **Powder coating**

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

### **Linax**

Linax is a linseed oil-based impregnation that provides extra long durability in outdoor environments and corresponds to impregnation class AB. The impregnated wood turns gray over time, which means that it should be re-oiled if necessary. Use a linseed-based oil for impregnated materials.

After traditional impregnation according to NTR AB, the wood is boiled in a hot linseed oil with or without color pigments under vacuum. The oil is penetrated into the surface on all six sides, which reduces moisture absorption in the wood and gives a dimensionally stable product over time. The result is a dried product with good resistance to rot that also has long maintenance intervals. Linax-impregnated furniture is intended for outdoor environments only.

## **Assembly and placement**

### **In-ground**

Cast in ground.

### **Surface mount**

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Levereras monterat.

## **Maintenance**

Scratches in the steel can be repainted with alkyd oil enamel.

### **Powdercoated steel**

Products that are powder-coated can be touch-up painted with alkyd paint.

### **Linax impregnated pine**

Outdoor furniture requires oiling every 5 years and panel products and roofs require oiling every 12 years. Maintenance should be done with linseed oil varnish. It is important that the wood is clean and dry (max. 20% moisture content) before it is finished with oil. When washing, do not use high-pressure cleaners. Washing should be done with lukewarm water and then rinsed off with a water hose at normal pressure. Strong grease-dissolving agents should not be used, but washing should be done with a mild household detergent. Detergents containing bleach should also not be used.

The oil can be applied with a roller or brush. Too much oil can cause growth on the wood and give a sticky surface. Attacks by growth can also occur if the wood has not been sufficiently dry or cleaned before the oil is applied. Growth does not damage the wood and is relatively easy to remove, but has a tendency to return.
