

nola®

Centrum Ashtray

Design

Centrum askkopp finns i två varianter. En med fimpgaller samt en med lock. Vid tömning öppnas hela bottenplattan med en sexkantnyckel. Askkopparna kan monteras på stativ, stolpe eller vägg. Centrum askkopp med fimpgaller har ett snedställt raster som förhindrar att flaskor ställs ovanpå locket. En snedställd innerplåt släcker snabbt pyrande cigaretter.

Dimensions and weight

Width: 15 cm
Height: 25 cm
Depth: 12 cm
Vikt: 2,5 kg

Volume: 2,5 L

Product numbers and combinations

LD89010 Centrum askkopp med fimpgaller.
LD89109 Snuskopp Bertil.
LD89010/1 Centrum askkopp med rostfri gördel.
LD89011 Centrum askkopp rostfri.

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Stainless steel

Stainless steel is an iron alloy with at least 10.5% chromium that often has good resistance to corrosion (rust) and other chemical attacks. A common misconception about stainless steel is that it does not rust at all; it can in fact corrode, especially in environments near the sea with high humidity.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Mounted to wall

Bolted in place to stand/wall bracket.

Bolts for walls not included.

Levereras helt monterad för slutgiltig fastsättning.

Askkoppen är förberedd för montering på stativ, stolpe eller vägg.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
