

Classical Cast-iron Urn

Design

This elegant cast-iron planter mimics the style of classical Greek urns. Ornamental urns have decorated formal gardens since antiquity, adding a note of elegant craftsmanship to the environments around them. This planter is a perfect complement to traditional gardens and period architecture. It also complements historic districts, classic courtyards and public parks.

Dimensions and weight

Height: 81 cm Ø: 80 cm Weight 180 kg

Product numbers and combinations

Ö30-51 Gjutjärnsurna.

Ö30-51BT10 Mona bevattningstank volym 10 L.

Standard colours

RAL 9005

Materials and surface treatments

The urn is made from rust-resistant sheet steel powder-coated in Noir 200 polyurethane paint.

Cast iron

Cast iron is iron with a carbon content between approximately 2 and 4 percent with a large proportion of recycled material. Compared to steel, it has a lower melting point and is therefore easier to melt and requires less energy. Thanks to the high carbon content, so-called graphite is formed. This is the main reason why cast iron, unlike steel, does not rust as quickly and thus has a very long life cycle.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Fully assembled.

Maintenance

Cast iron

Untreated cast iron eventually rusts, but this does not affect its durability. Products in cast iron that are anti-rust treated and painted black should, however, be touch-up painted and maintained, at regular intervals, if necessary or in case of possible damage, with alkyd paint.
