Concrete Things Armchair

Design Poul Christiansen & Boris Berlin, Komplot Design

These moulded concrete seats are massive, but their sleek shapes are offset by the weightless lines of the Grid chair. The concrete is smooth and unblemished, giving way to the Grid chair's wave-like patterns etched across their surfaces. Whether paired with the Grid chair or used on their own, these concrete designs create a striking permanent feature in any garden or terrace.

Dimensions and weight

Length: Fåtölj 77 cm Bord 77 cm

VARIANTS

A for anthracite gray colored concrete

INSTALLATION TYPE

N for surface mount.

Standard colours

- Infärgad betong antracitgrå
- Ljust grå betong ofärgad

Materials and surface treatments

Reinforced concrete. Standard light gray concrete. Other colors is available upon request.

Concrete

Concrete is cement mixed with crushed stone or aggregate. The material is very strong in compression but fragile in tension. To compensate for this concrete can be reinforced, often with steel.

Coloured concrete

Colored concrete is concrete in a color other than standard grey. Pigment is added to the dry mixture, which means that the concrete becomes coloured throughout. Each color has its own recipe.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Fully assembled.

Maintenance**Concrete**

Both normal concrete and fibre-reinforced concrete are sensitive to hard edge impacts. A concrete product that has been damaged can be repaired with polyester filler, such as the product "Plastic Padding".

Coloured concrete

Products made of coloured concrete are washed with a pressure sprayer at low pressure. Damaged products can be repaired with a repair kit that is available to order.
