Cortado Chair

Design SuperLab

Cortado is a nimble chair with a low backrest and armrests, ideal for spontaneous gatherings and public spaces like cafes, shopping centres, and rooftop terraces. It boasts a comfortable seat for indoor and outdoor use together with a robust steel frame.

Designed by the innovative Superlab, Cortado addresses the challenge faced by cafes: how to provide inviting seating without encouraging guests to linger too long. The solution lies in its low steel frame, serving as both backrest and armrests. Cortado is a comfy chair with a minimalist design, effortlessly fitting into a variety of settings.

Cortado is stackable, versatile, and invites you to enjoy a quick espresso, but with a touch of luxury - a cortado.

Padded seat in dry foam. Including upholstery and fabric.
 Choose fabric from Sunbrella's website or contact us at Nola for help more fabrics.

Standard colours

RAL 3022

Materials and surface treatments

It has a soft padded seat made in dry foam for outdoor use and a strong steel frame. The cushion is covered with a through-dyed acrylic outdoor fabric from Sunbrella. Steel has coating satin gloss 30.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
