Daisy Planter

Design Mia Lagerman

The daisy's popularity has led to its widespread use in urban areas, and now its rounded petals can be seen in planter design. The planter's bottom edge is sculpted in contours that recreate the outlines of daisy petals, creating a border of curving shapes. Made for use indoors and outside, the planter is fitted with adjustable feet to compensate for uneven surfaces.

Dimensions and weight

Daisy Round

Total height: 35 cm
 Planting height: 27 cm
 Outer diameter: 54 cm
 Inner diameter: 50 cm

Daisy Oval

Total height: 45 cm
 Planting height: 37 cm
 Length: 106 cm
 Width: 54 cm

Product numbers and combinations

Ö13-65 Daisy round planter.
 Ö13-66 Daisy oval planter.
 Ö13-65BT10 Mona water tank for Daisy round planter volume 10 liters.

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Assembly and placement**Freestanding**

Freestanding product that is placed directly on the ground.

No assembly required.

Maintenance**Powdercoated steel**

Products that are powder-coated can be touch-up painted with alkyd paint.
