

## **Draken – New Product!**

### **Bike stand**

**Design 02landskap**

The Draken bike rack was originally designed for Olof Palmes plats in Gothenburg, home to the Draken cinema. Inspired by 1950s architecture, the rack's simple lines and fine details create a classic and timeless look. The flowing pattern of the arches is not only aesthetically pleasing but also practical, accommodating both large and small bikes. 02landskap has also designed a planter guard in the same series.

#### Materials and surface treatments

##### Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

##### Hot-dip galvanized

Hot-dip galvanizing provides very strong protection against corrosion. The steel is dipped into a bath of hot liquid zinc. The zinc attaches and creates a surface coating on the steel part, which is then taken out of the bath and drained of excess zinc.

### Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

### Assembly and placement

#### In-ground

Cast in ground.

The bike stand is delivered assembled.

### Maintenance

#### Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
