## **Draken – New Product! Planter Guard**

**Design 02landskap**

The Draken planter guard was originally created for Olof Palmes plats in Gothenburg, where the Draken cinema is located. The design, inspired by 1950s architecture, offers a timeless and classic impression. The undulating form of the arches beautifully and effectively frames lush plantings. 02landskap has also designed a bike rack in the same series.

**Materials and surface treatments**

**Steel**

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

#### Hot-dip galvanized

Hot-dip galvanizing provides very strong protection against corrosion. The steel is dipped into a bath of hot liquid zinc. The zinc attaches and creates a surface coating on the steel part, which is then taken out of the bath and drained of excess zinc.

#### Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

#### Assembly and placement

##### In-ground

Cast in ground.

Delivered assembled.

#### Maintenance

##### Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
