Erba Stool

Design Mia Cullin

Home gardening is a growing sector with relevance to schools and retirement homes as well as communal gardens and residential yards. Meeting the demand for attractive, functional gardening equipment, Erba provides a workbench for nurturing plant life, storage for utensils and a trellis for hanging tools. Erba is a stool that is part of a furniture group together with a growing trellis and workbench with space for hanging tools and other gadgets that belong to growing.

Erba Stool is part of a furniture group together with a growing trellis and workbench with space for hanging tools and other gadgets that belong to growing. Erba helps make sowing seeds, growing shoots and harvesting plants a source of inspiration for individuals and communities alike.

Height: 67 cm

Depth: 42 cm

Product numbers and combinations

Ö16-35 Erba Stool

Standard colours

 RAL 6028

 RAL 7022

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
