Happy Chair

Design Bellitalia

Happy is a chair/bench with an asymmetrical shape. As a playful sculpture, it invites both play and relaxation. Happy is made of concrete and sprayed with polyurethane which is then painted. It is durable and both moisture and frost resistant and has a long life. Available in red, black and white and white granite. Part of the Organic series, designed by Matouš Holý, which consists of dynamic furniture with a clear sculptural expression, designed to fit into the living city. Happy can be combined with other parts in the Organics series.

RAL 9005 for reconstituted granite with black polyurethane paint.

RAL 9010 for reconstituted granite with white polyurethane paint.

Standard colours

RAL 3000

RAL 9005

RAL 9010

Materials and surface treatments

Concrete and Polyurethane varnish.

Reconstituted granite

Reconstituted granite consists of a cement base and river-based aggregates of various sizes. This gives us a material with the beauty of natural stone combined with the technical characteristics of concrete. To produce grey granite, cement is used with inert materials from local quarries. To produce white granite, white cement is used with white inert materials from local quarries.

General finishing Bellitalia

All visible surfaces are covered with a transparent protective anti-decay coating that prevents water absorption ensuring inalterability of the product over time and protect it from erosion by atmospheric pollutants and by the formation of frost and mold. On request, the goods can be treated with nanotechnology products or with anti-graffiti varnish, which facilitates the removal of any signs of vandalism carried out with permanent markers or spray.

Bush-hammering

The bush-hammered finishing breaks the surface stones, giving the product a rough appearance that brings out the best of the fine aggregates that compose it.

Polyurethane varnish (Glossy paint)

Exclusively for the products of the organic line, based on a treatment of bi-component base, is carried out using an intense and brilliant colour paint with acrylic-polyurethane uv-resistant varnish.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Delivered assembled

Maintenance**Polyurethane varnish**

Maintenance-free, but cleaned when necessary. Damage to the paint can be repaired with acrylic-polyurethane varnish.

Bellitalia Reconstituted stones

The materials are extremely durable that requires minimal maintenance. This purely consist of the treatment of the surface with very fine abrasive paper and in the re-application of one or more coats of acrylic protective varnish. In case of accidental chipping of the artifacts made of conglomerate, Bellitalia provides a repair kit consisting of a bi-component material the same as the original. To apply simply clean the chipped area, removing any dust or deposits and then apply the paste-component. Once the drying time is completed, it is sufficient to apply a coat of transparent acrylic anti-decay varnish.
