Hot Stone Seating Furniture

Design Tema

Heated surfaces make a big difference in cold weather. The Hot Stone bench is made with an integrated heating system that warms up the surface when switched on. The terrazzo is made from chips of marble and granite visible within a surface of polished concrete. Terrazzo is durable and easy to maintain. The bench is suitable for use both indoors and outside, wherever warmth is needed.

CERTIFICATION

Dimensions and weight

Height: 51 cm
 Weight 2000 kg
 Ø inner: 129 cm Ø outer: 159 cm

Product numbers and combinations

U12-03 Hot Stone.
 U12-03EL Hot Stone inkluderat värmeslingor.

Standard colours

Materials and surface treatments

Terrazzo concrete, electrical cables and power unit with stainless steel door.

Terrazzo

Terrazzo is an internationally used designation for a high-quality concrete that is used as a surface material. Terrazzo is a natural material consisting of aggregate (i.e. stone material, usually marble) mixed with cement. Terrazzo has a high wear resistance.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

The bench is manufactured with heating cables drawn through plastic pipes beneath the surface. A certified electrician is required to connect the electricity conduits to mains power supply.

Maintenance

Terrazzo concrete

Products made of polished terrazzo concrete are washed with soapy water to remove limescale deposits.
