

Kloss Stool

Design

Kubb is a multifunctional furniture system that offers great flexibility in terms of design and possible functions for different types of facilities. The base consists of a granite block with an alternative to a wooden seat. The seat can be rotated to create a pattern effect. By working with a module, the materials in the seat and block can be varied to create different aesthetic expressions.

Dimensions and weight

Width: 50 cm
Height: 60 cm
Sitting height: 30-50 cm
Depth: 50 cm

Product numbers and combinations

U30-40 Kubb, cube in granite, with seat.
U30-41 Kubb, cube in granite, without seat.
U30-42 Kubb, inclined cube in granite, without seat.

Append to product number

WOOD AND FINISH

CUM for cumaru.
J for jatoba.

Standard colours

Materials and surface treatments

Kubb is made of grey granite. Seat made of flat steel and cumaru or jatoba wood.

Jatoba - FSC-certified

Our FSC-labeled Jatoba is an untreated, very hard, and strong hardwood with a long shelf life. It has a brown color with black accent stripes that changes to a deep and rich red color over time.

Cumaru

Cumaru is sometimes called Brazilian Teak and is a hard and durable type of wood. The wood changes in a red/brown shade and does not need surface treatment thanks to its natural properties. Over the years Cumaru ages in a beautiful silver gray tone.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Granite

Natural stone is an excellent material to use when "furnishing" the outdoor environment. The stone withstands climatic stress and requires minimal maintenance. Natural stone is a timeless material with a very long lifespan. Granite is very hard and crack-free and has unusually high resistance to pressure, impact and deformation. See [the stone handbook](#) for more information about the material.

Assembly and placement

Delivered unassembled. The seats are mounted on the granite blocks.

The assembly involves drilling, plugging, screwing the seats and results in a demountable solution with the seat neatly aligned with the outer edges of the granite.

Maintenance

Jatoba

Jatoba basically requires no maintenance apart from regular wiping down.

Cumaru

Cumaru shifts in a reddish shade and does not need any maintenance thanks to its natural properties. Over the years Cumaru ages into a beautiful silver gray tone.

Granite

Granite withstands climatic stresses and requires minimal maintenance. Do not use a high-pressure cleaner when washing. Wipe with a damp cloth, possibly a solution of water and detergent or neutral Allrent for washing. Organic solvents can be effective against different types of stains and do not negatively affect the stone. See [the stone handbook](#) for more information on how to handle different types of stains.
