Kvadrat Ashtray

Design Eva Herdin

The Kvadrat ashtray is efficient, flexible and functional. The basket is perforated with a repeating pattern of square shapes, making it as lightweight as it is attractive. The ashtray can be paired with the Kvadrat litterbin, and together, the two have a wide range of combination possibilities.

CERTIFICATION

Dimensions and weight

Diameter: Ø 15 cm
Height: 24 cm
Support post height above ground: 76 cm
Height including support post: 80 cm
Weight: 2.5 kg
Vikt supporting post: ca 3,5 kg depending on attachment
Weight of concrete base: 23 kg

Rain cover

Total height: 46 cm
Height above ashtray: 22 cm
Width: 20 cm

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Stainless steel

Stainless steel is an iron alloy with at least 10.5% chromium that often has good resistance to corrosion (rust) and other chemical attacks. A common misconception about stainless steel is that it does not rust at all; it can in fact corrode, especially in environments near the sea with high humidity.

Aluminium

Aluminum is a soft light metal that is silvery to gray in color. Depending on the alloy, aluminum usually has good corrosion resistance. It is common for the aluminum to be extruded into tubes or rolled into a plate in the desired material thickness.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Delivered in parts for assembly on site.

Please refer to the assembly instructions. The litterbin is secured with bolts. Bolts are not included.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
