Långbordet Junior – New Product! Modular Furniture System

Design White Arkitekter

The popular Långbordet, designed for social gatherings, is now available in a version tailored for children. Långbordet Junior retains the original's robust construction and sleek aesthetic but is adjusted in height to suit school-aged children.

FEATURES

Designed for accessibility

Suitable for preschools and playgrounds

Dimensions and weight

Product numbers and combinations

U17-80B Långbordet picnic table, frame for child-friendly picnic table
U17-80 Långbordet picnic table, end frame without armrests
U17-80A Långbordet picnic table, end frame with armrests
U17-80M Långbordet picnic table, middle frame without armrests
U17-80MA Långbordet picnic table, middle frame with armrests
-
U17-81 Långbordet picnic table, 100 cm section, complete bench + table + complete bench
U17-82-HH Långbordet picnic table, 140 cm section, complete bench + table + complete bench
U17-82-UH Långbordet picnic table, 140 cm section, divided bench + table + complete bench
U17-82-UU Långbordet picnic table, 140 cm section, divided bench + table + divided bench
U17-83-HH Långbordet picnic table, 180 cm section, complete bench + table + complete bench
U17-83-UH Långbordet picnic table, 180 cm section, divided bench + table + complete bench, 1 wheelchair space
U17-83-UU Långbordet picnic table, 180 cm section, divided bench + table + divided bench, 2 wheelchair spaces
U17-84-R Långbordet picnic table, radius section 45°, left/right
-
U17-81-H/Rygg Långbordet backrest 100 cm
U17-82-H/Rygg Långbordet backrest 140 cm
U17-83-H/Rygg Långbordet backrest 180 cm
U17-83-U/Rygg Långbordet split backrest (2 pcs)
U17-80-DL Långbordet table spacers (2 pcs)
U17-80-DK Långbordet bench spacers (2 pcs)
U17-80BESLAG Långbordet fastening fittings, sold individually
B11-06 Additional fee for choosing a non-standard colour

Append to product number

WOOD AND FINISH

S100 for sioo:x treatment oak.

EK for oiled oak.

LIN for linax impregnated pine.

MH for oiled mahogany.

METAL SURFACE FINISH

RAL 2001

RAL 9005

RAL 9010

C for any color other than standard, start-up costs are added.

VARIANTS

B for child-friendly frames that are lower than the standard picnic table. Cannot be combined with standard frames but is used to build child-friendly picnic tables. Child-friendly frames are combined with the same seats, tables and options as the standard Långbordet picnic table.

Standard colours

	RAL 9005
	RAL 9010
	RAL 2001
	Oiled oak
	Oiled mahogany
	Linax impregnated pine
	SiOO:X treatment oak

Materials and surface treatments

Pine

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

Mahogany - FSC-certified

FSC-marked mahogany is a wood with good durability in the outdoor environment. In addition, it retains its color tone better than, for example, oak and teak. Mahogany lives and moves, sometimes more than teak.

Oak

Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable in case of moisture changes. Oak wood blackens if it is exposed to moisture or wetness for a long time. However, it does not affect the other properties of the wood. Thanks to its hardness and toughness, the oak wood is suitable for furniture and other use in exposed environments.

Wood oil

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

Linax

After traditional impregnation according to NTR AB, the wood is boiled in a hot linseed oil with or without color pigments under vacuum. The oil is penetrated into the surface on all six sides, which reduces moisture absorption in the wood and gives a dimensionally stable product over time. The result is a dried product with good resistance to rot that also has long maintenance intervals. Linax-impregnated furniture is intended for outdoor environments only.

SiOO:X treatment

Sioo:x is a wood protection with environmentally friendly silicon technology. Water-based and biocide-free. We use Sioo mainly for our oak furniture. Sioo:x treatment of is suitable for all woods, outside as well as inside, and gives a light surface without pigments. The surface is UV-resistant, water-repellent and non-stick. Active and preventive action against algae, mould and pests. Also rot-proof, wood-strengthening and fire-retardant. This wood protection provides long durability and easy maintenance.

Compact laminate

Compact laminate is a sheet material made of kraft paper and phenolic resins, pressed together under heat and extreme pressure. The material is completely water resistant.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Stainless steel

Stainless steel is an iron alloy with at least 10.5% chromium that often has good resistance to corrosion (rust) and other chemical attacks. A common misconception about stainless steel is that it does not rust at all; it can in fact corrode, especially in environments near the sea with high humidity.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Maintenance

Oiled oak

Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil.

Oiled mahogany

Oiled mahogany should be oiled two times a year.

Linax impregnated pine

Linax is a linseed oil-based impregnation that provides extra long durability in outdoor environments and corresponds to impregnation class AB. The impregnated wood turns gray over time, which means that it should be re-oiled if necessary. Use a linseed-based oil for impregnated materials.

SiOO:X treatment oak

Sioo:x-treated products are treated twice upon delivery; once with a wood protection (Premium Träskydd Altan) and once with a surface protection (Premium Ytskydd Altan). After 12 - 18 months, for best durability, the surface should be treated once more with Sioo:x Premium Ytskydd Altan. It is important to keep the product clean, otherwise the surface protection can be destroyed. Products that are exposed to heavy mechanical wear may need extra treatments. The surface treatment has a tested effect according to the standards EN 46 and EN 113.

For information about the Sioo treatment see the website www.sioox.se.

Compact laminate

Compact laminate is very a strong and heavy material. It does not normally require maintenance.

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
