Le Soleil Swivel Armchair

Design Erik Österlund

The laid-back design of Le Soleil swivel chair is every sun worshipper's dream. The oak seat and backrest are gently angled to position the body for relaxation, while the rotating steel base enables those seated to follow the sun's movement through the sky. Le Soleil is reminiscent of the shapes used by Jean Prouvé, creating a twenty-first century design with an elegant mid-century twist.

Dimensions and weight

Width: 58 cm
Height: 84 cm
Sitting height: 45 cm
Depth: 79 cm
Weight 25 kg

Individual dimensions

Wood components: 19 mm x 55 mm
The steel parts in the frame: 8 mm thick
Steel pipe in the frame: Ø 50 mm

Product numbers and combinations

U19-10E Le Soleil armchair
B11-06 Startup cost for powder coating steel in a color other than standard

Append to product number

WOOD AND FINISH

EK for oiled oak.

METAL SURFACE FINISH

C for any color of steel, at an additional cost.

INSTALLATION TYPE

M for in-ground.

N for surface mount.

Standard colours

Gris 150 Sablé

Materials and surface treatments

The frame is made in zinc-electroplated steel and both the frame and armrests are polyester powder-coated. The wooden components are crafted in oiled oak or. Standard color Gris 150 Sablé.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Oak

Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable in case of moisture changes. Oak wood blackens if it is exposed to moisture or wetness for a long time. However, it does not affect the other properties of the wood. Thanks to its hardness and toughness, the oak wood is suitable for furniture and other use in exposed environments.

Wood oil

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

Assembly and placement

In-ground

Cast in ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Fully assembled.

Maintenance

Oiled oak

Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil.

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
