Life Ashtray

Design

A large free-standing ashtray that is mounted in the ground by bolting. The volume is 3 liters and the ash is collected in a small tin container which is placed inside the ashtray just below the toilet seat. Emptying is simple and smooth by opening the door with a triangular key (included) and emptying the container. This ashtray is perfect for entrances, outdoor dining, coffee and rest areas.

Dimensions and weight	<p>Width: 20 cm Height: 100 cm Depth: 16 cm</p>
Product numbers and combinations	<p>Ö16-73/LF Life Ashtray, 3 litres, stainless steel. Freestanding or for bolting.</p> <p>Append to product number</p> <p>METAL SURFACE FINISH</p> <p>RAL 9005</p> <p>C for any color other than standard, starting cost is added.</p>
Standard colours	<p> RAL 9005</p>
Materials and surface treatments	<p>Steel Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.</p> <p>Stainless steel Stainless steel is an iron alloy with at least 10.5% chromium that often has good resistance to corrosion (rust) and other chemical attacks. A common misconception about stainless steel is that it does not rust at all; it can in fact corrode, especially in environments near the sea with high humidity.</p> <p>Powder coating Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.</p>
Assembly and placement	<p>Askkoppen är förberedd för bultning, då tas den nedersta listen bort och bultas inifrån.</p>
Maintenance	<p>Powdercoated steel Products that are powder-coated can be touch-up painted with alkyd paint.</p> <p><u>Read more in our general maintenance advice at nola.se/en/care-and-maintenance</u></p>
