LowChair Armchair

Design Mats Aldén

Designed with comfort in mind, the LowChair is a spacious design made with a tilted seat and backrest that encourages the user to sit back and unwind. Produced with a matching footstool, the LowChair promotes relaxation, making it a perfect choice for poolside patios, outdoor terraces and beachfront balconies. The armchair's striking design and generous proportions are also suited to sporty spaces, such as golf courses, tennis clubs, spas or resorts.

The High / Low furniture series is approved in [Svanens Husportal](#) and is environmentally assessed via [Byggvarubedömningen](#) and [SundaHus](#).

WOOD AND FINISH

EK for oiled oak.

METAL SURFACE FINISH

C for any color of steel, at an additional cost. Choose a RAL colour.

INSTALLATION TYPE

N for surface mount.

Standard colours

- RAL 9010
- Gris 2150 Sablé
- Oiled oak

Materials and surface treatments

Oak

Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable in case of moisture changes. Oak wood blackens if it is exposed to moisture or wetness for a long time. However, it does not affect the other properties of the wood. Thanks to its hardness and toughness, the oak wood is suitable for furniture and other use in exposed environments.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Wood oil

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Fully assembled.

Maintenance

Oiled oak

Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil.

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
