Max Steel Trellis

Design Bernt Fröderberg

Trellises add a decorative touch, whether mounted directly to a structure or erected in the landscape. This wall-mounted trellis is designed to enhance buildings as it promotes the growth of trailing vines. It may also be attached to garden walls to add a decorative feature. Crafted in steel, Max encourages the growth of trailing plants up to the top, and even beyond.

Dimensions and weight	<p>Length: 280 cm Width: 55 cm Depth: 37 cm Weight 20 kg</p> <p>Recommended height above ground: 30 cm</p>
Product numbers and combinations	<p>Append to product number</p> <p>INSTALLATION TYPE</p> <p>V for mounted to wall.</p>
Standard colours	
Materials and surface treatments	<p>Steel Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.</p> <p>Hot-dip galvanized Hot-dip galvanizing provides very strong protection against corrosion. The steel is dipped into a bath of hot liquid zinc. The zinc attaches and creates a surface coating on the steel part, which is then taken out of the bath and drained of excess zinc.</p> <p>Powder coating Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.</p>
Assembly and placement	<p>Mounted to wall Bolted in place to stand/wall bracket.</p> <p>Bolts for walls not included.</p> <p>Fully assembled.</p>
Maintenance	<p>Not normally required.</p> <p>Hot dip galvanized steel Hot-dip galvanized can be touch-up painted with so-called "cold galvanizing".</p> <p><u>Read more in our general maintenance advice at nola.se/en/care-and-maintenance</u></p>
Versions	<p>Available in a choice of three finishes: cold galvanised, hot-dip galvanised and powder-coated in black.</p>
Character	

A wall-mounted trellis designed to promote the growth of foliage and trailing vines and provide a decorative garden element.
