

Mirja Tree Guard

Design Bernt Fröderberg

Mirja is a minimal, modern tree guard crafted from strips of laser-cut steel. The steel strips are held together by metal bands, widening at the base to reinforce support at ground level. Higher than many other tree guards, Mirja offers excellent protection for taller trees too.

CERTIFICATION

Dimensions and weight

Height: 185 cm Weight 43 kg

Height: 185 cm Top diameter: 40 cm Base diameter: 60 cm

Product numbers and combinations

Ö20-12\$ Mirja tree guard

Ö20-11VL/J Ground anchor, set of 4

Standard colours

RAL 9005

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Stainless steel

Stainless steel is an iron alloy with at least 10.5% chromium that often has good resistance to corrosion (rust) and other chemical attacks. A common misconception about stainless steel is that it does not rust at all; it can in fact corrode, especially in environments near the sea with high humidity.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Some assembly required. The fittings required for ground-mounting should be ordered separately.

Freestanding. Should be attached to a tree grille at the base or ground-mounted using the fittings supplied.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.

Character

Mirja is a minimal, modern tree guard crafted from sleek strips of laser-cut steel and metal bands.

Bernt Fröderberg

Bernt Fröderberg is a landscape architect MSA with long and broad experience. The projects span everything from private gardens, homes, parks to complex road environments.

— In my role as a designer, I hope to be able to bring a care for the built details in the green environment that enhances the final impression even in relatively everyday construction projects. The importance of well-designed solutions in the slightly more prestigious assignments can hardly be underestimated. My starting points in the design work are, among other things, to use renewable materials and to give the built detail a long life.
