Organic Furniture Series

Design Bellitalia

As a complement to our own range, we market products from Italian Bellitalia, which like Nola works for good design in the public conservatory. Bellitalia is active in street and urban landscaping and excels with organic shapes and exciting materials such as concrete, marble and polyurethane. The products signal quality, functionality and innovative design. Furniture designed to fit into the living city. The Organic series, designed by Matouš Holý, is designed with the idea of the living city in mind. The furniture is adapted to dynamically fit into the different architectural parts of the urban environment. Made of concrete and sprayed with polyurethane which is then painted, they are durable and durable and have a long service life. Organic is available in different shapes and designs in the colors red, black or white and in white granite. The series consists of Harmony, Cuddly and Family as chair / table / seating and Happy and Funny as bench / seating. The different parts can be combined with each other.

RAL 9005

RAL 9010

Materials and surface treatments

Reconstituted granite

Reconstituted granite consists of a cement base and river-based aggregates of various sizes. This gives us a material with the beauty of natural stone combined with the technical characteristics of concrete. To produce grey granite, cement is used with inert materials from local quarries. To produce white granite, white cement is used with white inert materials from local quarries.

General finishing Bellitalia

All visible surfaces are covered with a transparent protective anti-decay coating that prevents water absorption ensuring inalterability of the product over time and protect it from erosion by atmospheric pollutants and by the formation of frost and mold. On request, the goods can be treated with nanotechnology products or with anti-graffiti varnish, which facilitates the removal of any signs of vandalism carried out with permanent markers or spray.

Bush-hammering

The bush-hammered finishing breaks the surface stones, giving the product a rough appearance that brings out the best of the fine aggregates that compose it.

Polyurethane varnish (Glossy paint)

Exclusively for the products of the organic line, based on a treatment of bi-component base, is carried out using an intense and brilliant colour paint with acrylic-polyurethane uv-resistant varnish.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Delivered assembled

Maintenance

Polyurethane varnish

Maintenance-free, but cleaned when necessary. Damage to the paint can be repaired with acrylic-polyurethane varnish.

Bellitalia Reconstituted stones

The materials are extremely durable that requires minimal maintenance. This purely consist of the treatment of the surface with very fine abrasive paper and in the re-application of one or more coats of acrylic protective varnish. In case of accidental chipping of the artifacts made of conglomerate, Bellitalia provides a repair kit consisting of a bi-component material the same as the original. To apply simply clean the chipped area, removing any dust or deposits and then apply the paste-component. Once the drying time is completed, it is sufficient to apply a coat of transparent acrylic anti-decay varnish.
