Ortho Furniture Group

Design Inventarium

Som ett komplement till vårt eget sortiment marknadsför vi även produkter från Danska [Inventarium](#). Inventarium arbetar liksom Nola för hög design och god tanke i det offentliga rummet. För mer information om Ortho se produktblad för nedladdning under montering.

Dimensions and weight

Ortho Table:

Length: 180 cm. Depth: 80 cm. Height: 70 cm.

Ortho Bench

Length: 180 cm
 Height: 45 cm
 Depth: 31 cm

Ortho Park Bench

Length: 180 cm
 Sitting height: 44 cm
 Depth: 52 cm

Ortho

Length: 180 cm
 Width: 21,5 cm
 Height: 86 cm

WOOD AND FINISH

JAT for jatoba.

Wooden slats in Ash or Jatoba.

Standard colours

Materials and surface treatments

Ash

Ash wood is light, hard and tough, bends easily and is light in colour. The wood has clear annual rings and, thanks to its natural properties, is often used for furniture, carpentry and flooring.

Jatoba - FSC-certified

Our FSC-labeled Jatoba is an untreated, very hard, and strong hardwood with a long shelf life. It has a brown color with black accent stripes that changes to a deep and rich red color over time.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Hot-dip galvanized

Hot-dip galvanizing provides very strong protection against corrosion. The steel is dipped into a bath of hot liquid zinc. The zinc attaches and creates a surface coating on the steel part, which is then taken out of the bath and drained of excess zinc.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Maintenance

Jatoba

Jotoba basically requires no maintenance apart from regular wiping down.

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.

Hot dip galvanized steel

Hot-dip galvanized can be touch-up painted with so-called "cold galvanizing".
