## Park Friend Bike Rack

Design Åsa Jonasson

The Park Friend bike rack is an attractive multifunctional outdoor design. As its name suggests, the bike rack is a user-friendly and environmentally-aware addition to any outdoor space. Made with minimal materials, the design includes a sleek seat where users can sit comfortably even when the bicycle stand is in use.

#### Dimensions and weight

Length: 180 cm  
 Height: 80 cm  
 Sitting height: 45 cm  
 Sitting depth: 46 cm  
 Depth: 119 cm

#### Individual dimensions

Steel tube construction: Ø 32 x 2.6 mm

#### Product numbers and combinations

Ö03-92 Park Friend cykelbänk

#### Append to product number

#### WOOD AND FINISH

IPE for ipé.  
 LIN for linax impregnated pine.

#### INSTALLATION TYPE

N for surface mount.

#### Standard colours

#### Materials and surface treatments

#### Pine

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

#### Ipé

Our FCS-marked Ipé is an extremely hard wood thanks to its high density. The hardness gives remarkably high physical durability and resistant to the effects of sun, rain, and other weather over decades.

#### Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

### **Linax**

After traditional impregnation according to NTR AB, the wood is boiled in a hot linseed oil with or without color pigments under vacuum. The oil is penetrated into the surface on all six sides, which reduces moisture absorption in the wood and gives a dimensionally stable product over time. The result is a dried product with good resistance to rot that also has long maintenance intervals. Linax-impregnated furniture is intended for outdoor environments only.

### **Wood oil**

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

### **Hot-dip galvanized**

Hot-dip galvanizing provides very strong protection against corrosion. The steel is dipped into a bath of hot liquid zinc. The zinc attaches and creates a surface coating on the steel part, which is then taken out of the bath and drained of excess zinc.

## **Assembly and placement**

### **Freestanding**

Freestanding product that is placed directly on the ground.

### **Surface mount**

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

## **Maintenance**

### **Ipé**

Ipé has a durability of up to 40 years if it is not treated with more than normal care. With regular oiling once a season with wood oil, the durability is up to 100 years. Untreated Ipé will turn from reddish brown to a more silver gray color over time. If you want to keep the brown color, it must be treated and maintained with wood oil.

### **Linax impregnated pine**

Linax is a linseed oil-based impregnation that provides extra long durability in outdoor environments and corresponds to impregnation class AB. The impregnated wood turns gray over time, which means that it should be re-oiled if necessary. Use a linseed-based oil for impregnated materials.

### **Hot dip galvanized steel**

Hot-dip galvanized can be touch-up painted with so-called "cold galvanizing".
