Rekta Litterbin

Design Christina Jonsson Lillienau

Rekta's openings are sized to indicate the types of waste permitted and sort them for recycling. The litterbin may be ordered with perforated sides. Text or logos can be laser-cut into the metal panels shaping the litterbin's back and sides. Inner rings hold the plastic liners in place, which are easily removed through a side door or the lid.

CERTIFICATION

Dimensions and weight

Length: 55 cm
 Width: 40 cm
 Height: 71 cm
 Weight 29 kg

Lid: 44 x 55 cm

Volume: 134 L.

Individual dimensions

Lid in 4 mm sheet steel.

Append to product number

METAL SURFACE FINISH

S for black RAL 9005.

C for any color other than standard, starting cost is added.

Standard colours

■ RAL 7043
 ■ RAL 8019

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Fully assembled.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.

Character

Rekta's cubic shape is easy to position alongside walls, or in corners. Logos or words can be laser-cut into its surface, giving it potential to be part of a branding campaign.
