Rousseau Furniture Group

Design Anki Gneib

With their elegant steel frames, the designs in the new Rousseau furniture group present a compelling meeting of classic styles and contemporary form. The furniture group is suited to a wide range of environments, from outdoor cafes and restaurants, to courtyards and gardens.

Dimensions and weight	Rousseau Chair
	Width: Stol 45 cm Karmstol 66 cm
	Height: 81 cm
	Armrest height: 67,5 cm
	Sitting height: 45 cm
	Sitting depth: 47 cm
	Depth: 62 cm
	Weight 7,8 kg/ 8 kg
	Rousseau Table
	Length: 180 cm
	Width: 79 cm
	Height: 72 cm
	Weight 9,2 kg
Product numbers and combinations	U80-70 Rousseau chair
Combinations	U80-70A Rousseau chair with armrests
	U80-75 Rousseau folding table
	Append to product number
	WOOD AND FINISH
	E for oiled oak.
	MH for oiled mahogany.
	METAL SURFACE FINISH
	C for a color other than standard, initial cost is added.
Standard colours	RAL 7022
	Oiled oak
	Oiled mahogany
Materials and surface	Mahogany - FSC-certified
treatments	FSC-marked mahogany is a wood with good durability in the outdoor
	environment. In addition, it retains its color tone better than, for example, oak
	and teak. Mahogany lives and moves, sometimes more than teak.
	Oak
	Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable
	in case of moisture changes. Oak wood blackens if it is exposed to moisture or
	wetness for a long time. However, it does not affect the other properties of the
	wood. Thanks to its hardness and toughness, the oak wood is suitable for
	furniture and other use in exposed environments.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

	Powder coating Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.
	Electrogalvanized Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.
	Wood oil Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.
Assembly and placement	Freestanding Freestanding product that is placed directly on the ground.
Maintenance	Oiled oak Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil. Black stains on oiled oak can be removed with oxalic acid.
	Oiled mahogany Oiled mahogany should be oiled two times a year. Powdercoated steel Products that are powder-coated can be touch-up painted with alkyd paint.
