Sake Planter

Design Gunilla Hedlund

This modular planter is crafted from components that combine together to create a striking silhouette. The components attach to each other, enabling the planter to be built up to different heights. The components can be stacked to create a scale from light to dark. Sake's versatility maximizes its functionality, and its distinctive shape has a strong resonance with styles from the Far East.

Dimensions and weight

Height: 26 cm / 16 cm
 Ø: 80 cm

Bottom plate Ø80 cm. Height: 26 cm.
 Extension part Ø80 cm. Height: 16 cm.
 Bottom plate Weight: 41,5 kg.
 Extension part Weight: 25,5 kg.

Product numbers and combinations

Ö14-30 Sake, planter (bottom pot)
 Ö14-31 Sake, planter (extension part)
 Ö14-31-2 Sake, base plate in oiled plywood
 Ö14-30BT10 Mona water tank, 10 liters

Append to product number

METAL SURFACE FINISH

S for Noir 200 sablé.
 G for Gris 900 sablé.
 LG for Gris 400 sablé.
 C for any color other than standard, starting cost is added.

Standard colours

 Gris 2150 Sablé
 Gris 2900 Sablé
 Noir 2200 Sablé

Materials and surface treatments

Recycled sand cast aluminium

Aluminium recycled from scrap, hand cast in sand moulds. The energy consumption when producing recycled aluminium is about 5% of that used when producing virgin aluminium.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Maintenance

Sand cast aluminium

Maintenance on aluminium is not normally needed, but make sure to wash and keep the material clean. Untreated aluminium develops a matte surface over time.

Powder coated Aluminium

Products that are powder-coated can be touch-up painted with alkyd paint if necessary.

Versions

En bottenkruka som kan användas för sig.
Påbyggnadsdelar som används för att bygga på höjden.
Bottenplatta i oljad plywood för placering i valfri påbyggnadsdel för att minska jordvolymen och anpassning till växthöjden.

Character

Modular planter crafted from curving, modular components, attach to each other enabling the planter to be built up to different heights.
