

Share Stool

Design Thomas Bernstrand

Share is a perfect furniture series for parks, cities and roof terraces where you want a steady public seating solution that can also be moved around. Lock and stack during storage. The Share chair have a comfortable back slope and lower seat height. We are happy to laser cut the name of the park into the seat/back surfaces of the furniture and it is also possible to order Share without a lock function. They're stackable anyway!

CERTIFICATION

N for surface mount.

Standard colours

 RAL 1018

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

In-ground

Cast in ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

All furniture is delivered fully assembled. Bolt for fastening pallet holder or locking arch is not included.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
