

Rökruta Smoker's Shelter

Design Olle Anderson

Indoor smoking is becoming a thing of the past. Our smoker's shelter provides the perfect environment for outdoor smoking in the form of a purpose-built enclosure with plenty of room inside. The easy-to-assemble prefabricated structure is built with a durable roof and transparent walls that provide shelter from rain and wind. The ashtrays and seating inside can be chosen from among our products, enabling the shelter's interior to be customised as required.

Dimensions and weight

Length: 219 cm
 Width: 219 cm
 Height: 240 cm
 Center-to-center distance 180 cm

Roof height: 224 cm

Individual dimensions

The steel pipe in the structural supports: 50,8 mm and 42 mm
 The reinforced glass in the walls is 8 mm thick
 The base plates are 6 mm thick with a diameter of 143 mm

Product numbers and combinations

Ö07-00 Rökruta. (Bänk och askopp ingår inte)
 Ö16-68K Askopp Kvadrat svart
 U18-50N Stadsbänken, 120 cm oljad ek

Standard colours

■ RAL 9005
 ■ RAL 7021

Materials and surface treatments

All steel parts are zinc-electroplated and powder-coated.

Assembly and placement

Please refer to the assembly instructions.

The Smoker's Shelter should be secured to the pavement or a concrete base with bolts. Three M10 bolts are required per base plate, twelve are required for the total structure. Bolts are not included.

Maintenance

Glass and fibreglass may require routine cleaning. Avoid strong detergents. The polyester powder-coated steel parts can be repainted with alkyd oil enamel as required.

Versions

The structural supports are available in standard colours black RAL 9005 or grey RAL 7021. The standard version has 'HÄR RÖKER VI' printed on one glass panel. If no text is required, please inform us when you place your order.

Character

A prefabricated enclosure that provides seating, ashtrays and shelter for smokers.

Designers

Olle Anderson
