Solliden Trolley

Design

The Solliden chairs are portable and stackable, and can be loaded onto this trolley designed to transport them to and from storage. The trolley can hold up to 25 chairs at a time. The trolley is designed with a towbar and fitted with rubber-coated wheels for smooth handling.

C for any color other than standard, at additional cost.

Standard colours

RAL 7035
RAL 6005

Materials and surface treatments

Steel
Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Electrogalvanized
Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating
Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Fristanding.

Maintenance

Powdercoated steel
Products that are electro-galvanized and powder-coated can be touch-up painted with alkyd paint.
