Promenad – New Product! Walking Bar

Design Eva Schildt

Promenad Walking Bar is designed for care homes and healthcare settings where movement and activity are central to daily life. Walking independently supports quality of life, well-being and self-reliance. With the Walking Bar, users can train strength and mobility, either on their own or together with a physiotherapist. It offers a safe, straightforward and enjoyable way to exercise.

Its simple, refined form and durable construction make it a natural fit for parks, courtyards and gardens, while encouraging everyday activity. The Walking Bar can be installed on surfaces such as gravel, bark or grass, turning walks into an all-year-round experience.

Promenad is developed by Eva Schildt in close collaboration with Anette and Tina Blåberg at Good Garden, experts in health design for care and nursing environments.

FEATURES

Dimensions and weight

Length: 255 cm Width: 87 cm Height: 86 cm

C-C dimensions: 72.5 cm

Material dimensions

Tube dimensions: 4,2 and 4,5 cm Stainless steel end balls: \emptyset 6 cm

Product numbers and combinations

Ö75-00 Promenad Walking bar, 255 cm.

METAL SURFACE FINISH

RAL 6009 (dark green) RAL 9005 (black)

C for other colors than standard, additional starting cost.

Standard colours

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Stainless steel

Stainless steel is an iron alloy with at least 10.5% chromium that often has good resistance to corrosion (rust) and other chemical attacks. A common misconception about stainless steel is that it does not rust at all; it can in fact corrode, especially in environments near the sea with high humidity.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement Fr

Freestanding

Freestanding product that is placed directly on the ground.

Maintenance

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.

Designers

Eva Schildt

The designer Eva Schildt was influenced by her upbringing in the Stockholm archipelago, which shows in her artistic work. Since graduating in furniture and product design at Beckmans College of Design in 2001, she has designed a wide range of things from furniture and textiles to packaging and exhibition displays. Eva also works as an interior architect.

Eva Schildt – Where Tradition Meets Functional Modernity

Based in Stockholm, Schildt is driven by the belief that our environment is in a constant state of change—a concept beautifully reflected in her nature-inspired designs. Her work seamlessly fuses classic elements with a touch of humble modernity.

Working with a diverse range of materials and techniques, Schildt effortlessly balances the art of craftsmanship with the precision of mass production. Her often sculptural designs burst with everyday humor, personality, and outstanding functionality, earning her international recognition. Among her celebrated creations are the iconic Constella and Äng from Klong.

You can experience Eva Schildt's work at Stockholm's National Museum and Gothenburg's Röhsska Museum.
