Tessin Lounge Chair

Design

The gardens designed by seventeenth-century Swedish architect Nicodemus Tessin number among his greatest achievements. Although none of the garden benches from Tessin's era survive today, this elegant park bench emulates the architect's unmistakable style. This park bench is a popular choice for formal gardens, or to be placed among classical statues. It can be found in parks with symmetrical terraces, and on avenues flanked by lines of trees.

CERTIFICATION

FEATURES

 Designed for accessibility

Dimensions and weight

Width: 60 cm

Height: 83cm respektive 84,5cm (Stockholmsmodellen)

Sitting height: 44 cm, Stockholmsmodellen har höjd 45,5 cm

Depth: 70 cm

Length: 180 cm Width: 72 cm Normal height: 44 / 87 cm Taller version (Tessin Stockholm): 46 / 87 cm Weight: 80 kg INDIVIDUAL MEASUREMENTS The slats for the seat measure 32 mm × 142 mm The backrest measures 31 mm × 128 mm

Product numbers and combinations

U16-34 Tessin lounge chair, accessible

U16-35 Tessin lounge chair

B11-06 Startup cost for powder coating steel in a color other than standard

B11-07 Starting cost for another color of wood than standard

Append to product number

WOOD AND FINISH

EK for oiled oak.

MH for oiled mahogany.

LG for Furu NCS S 7020-G10Y

SG for Pine NCS S 8010-G10Y

C for any color other than standard on top-glazed pine, initial cost is added.

INSTALLATION TYPE

N for surface mount.

Standard colours

- RAL 9005
- NCS S 8010-G10Y (Grön)
- NCS S 7020-G10Y
- Oiled oak
- Oiled mahogany

Materials and surface treatments

The cast-iron frame is painted in standard colour black RAL 9005.

The pine slats are painted in alkyd oil enamel in standard colour green NCS S 7020-G10Y or made in oiled oak or Mahogany.

Stockholm in colour green NCS S 8010-G10Y

Pine

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

Mahogany - FSC-certified

FSC-marked mahogany is a wood with good durability in the outdoor environment. In addition, it retains its color tone better than, for example, oak and teak. Mahogany lives and moves, sometimes more than teak.

Oak

Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable in case of moisture changes. Oak wood blackens if it is exposed to moisture or wetness for a long time. However, it does not affect the other properties of the wood. Thanks to its hardness and toughness, the oak wood is suitable for furniture and other use in exposed environments.

Cast iron

Cast iron is iron with a carbon content between approximately 2 and 4 percent with a large proportion of recycled material. Compared to steel, it has a lower melting point and is therefore easier to melt and requires less energy. Thanks to the high carbon content, so-called graphite is formed. This is the main reason why cast iron, unlike steel, does not rust as quickly and thus has a very long life cycle.

Wood oil

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

Water-based glaze

Varnishing of wood is done with a water-based varnish. A water-based paint that is kinder to the environment. Under normal use, the paint has a good wear resistance and long durability.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

Fully assembled.

Maintenance

The cast iron stand is touch-up painted with alkyd paint.

Oiled oak

Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil.

Oiled mahogany

Oiled mahogany should be oiled two times a year.

Water-based glazed pine

Products in varnished pine must be maintained regularly with alkyd paint.

Maintenance intervals approximately 1 time per year. Damage and cracks should be repaired immediately. Touch-up paints in spray packaging are available in standard colors to order.

Cast iron

Untreated cast iron eventually rusts, but this does not affect its durability.

Products in cast iron that are anti-rust treated and painted black should, however, be touch-up painted and maintained, at regular intervals, if necessary or in case of possible damage, with alkyd paint.
