Töre Modern Storage Shed

Design White Arkitekter

Low-key, laid-back and discreet, this storage shed provides outdoor space where storage is needed. Töre Modern's pre-fabricated construction is an efficient design that can be ordered in several sizes. Windows are optional, and the parts are delivered in sections ready for assembly. Töre Modern can be used for storage of items, bicycle parking, sorting/recycling, or as an outdoor workshop.

V = Windows built in left side wall

Standard colours

Materials and surface treatments

AB-impregnerad furu.

Storage house in AB-impregnated pine, cover panel in spruce and metal roof.

Pine

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Supplied in blocks for final installation.

Maintenance

The standard version is delivered with untreated walls, which must be painted after assembly, and maintained as needed.

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.
