Up- Furniture Series

Design Claesson Koivisto Rune

The -Up! product series is designed for hotel hospitality and food & beverage services. -Up! includes display designs, such as the banner holder and menu holder. The torchier is a decorative feature that casts a warm glow over its surroundings, while the rope barrier provides an effective and effortless means of organising the crowd. Made for outdoor use, the ashtray is freestanding and weather-resistant. A coat rack provides space for winter jackets. The tray-table has a detachable surface and a choice of two different bases.

Dimensions and weight

Hang-up coat rack

Width: Fotens bas \varnothing 24 cm

Height: 180 cm

Weight with cast iron foot: 26 kg

Weight with aluminum foot: 9 kg

Individual dimensions

Top in turned aluminium.

Polished stainless steel coat hanger.

Pole: \varnothing 3 cm.

Line-Up barrier post

Length: 150 cm

Height: 104 cm

\varnothing : 24 cm

Center-to-center distance 160 cm

Weight with cast iron base: 30 kg

Weight with aluminium base: 15 kg

Individual dimensions

Top in turned aluminium.

Polished stainless steel coat hanger.

Pole \varnothing 3 cm.

Stand-up banner holder

Height: 200 cm

\varnothing : 24 cm

Weight with cast iron foot: 28 kg

Weight with aluminum foot: 13 kg

Individual dimensions

Top in turned aluminium.

Polished stainless steel coat hanger.

Pole: \varnothing 3 cm.

Banner width: 36 cm.

Light-up torchier

Height: 116,5 cm

\varnothing : 24 cm

Weight 12 kg

Individual dimensions

Top in turned aluminium.

Polished stainless steel coat hanger.

Pole \varnothing 3 cm.

Sign-up sign holder

Width: Ø 24 cm

Height: 129 cm

Menu frame: 33 x 46 cm, suitable for A3.

Weight with a cast iron base: 28 kg

Weight with a cast aluminium base: 13 kg

Individual dimensions

Top in turned aluminium.

Polished stainless steel coat hanger.

Pole Ø 3 cm.

Append to product number

METAL SURFACE FINISH

G for gray Gris 2900 Sablé.

S for Black Noir 2200 Sablé.

V for white Ivoire Blanche 😊

C for any color other than standard, starting cost is added.

VARIANTS

G for cast iron foot.

A for aluminum foot.

Standard colours

Materials and surface treatments

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated.

Cast iron

Cast iron is iron with a carbon content between approximately 2 and 4 percent with a large proportion of recycled material. Compared to steel, it has a lower melting point and is therefore easier to melt and requires less energy. Thanks to the high carbon content, so-called graphite is formed. This is the main reason why cast iron, unlike steel, does not rust as quickly and thus has a very long life cycle.

Recycled sand cast aluminium

Aluminium recycled from scrap, hand cast in sand moulds. The energy consumption when producing recycled aluminium is about 5% of that used when producing virgin aluminium.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

Freestanding

Freestanding product that is placed directly on the ground.

Delivered in larger parts for easy on-site assembly.

Maintenance

Cast iron

Untreated cast iron eventually rusts, but this does not affect its durability.

Products in cast iron that are anti-rust treated and painted black should, however, be touch-up painted and maintained, at regular intervals, if necessary or in case of possible damage, with alkyd paint.

Powdercoated steel

Products that are powder-coated can be touch-up painted with alkyd paint.

Powder coated Aluminium

Products that are powder-coated can be touch-up painted with alkyd paint if necessary.

[Read more in our general maintenance advice at nola.se/en/care-and-maintenance](https://nola.se/en/care-and-maintenance)

Versions

The group includes an coat rack, banner-holder, menu-holder, rope barrier, torchier and side table.

Character

The Up furniture group is a collection of smart 'hospitality' accessories intended to make serving the public much smoother.

Designers

Claesson Koivisto Rune

Claesson Koivisto Rune is a Swedish architectural partnership, founded in Stockholm, in 1995, by Mårten Claesson, Eero Koivisto and Ola Rune. Begun as an architectural firm, it is now an internationally-acclaimed, multi-disciplinary office with an equal emphasis on both architecture and design.

Claesson Koivisto Rune are the first Swedish office to have exhibited in the international section at the *Venice Architecture Biennale*, in 2004. The office has received an array of awards and recognitions, amongst them the prestigious *Red Dot* in five different categories and *Designer of the Year* by *Elle Décor Italia*, 2011 and 2014. 2020 *Interior Designer of the Year*, *Elle Deco Japan*.

Designs by Claesson Koivisto Rune are found in the collections of international brands, such as Arflex, Boffi, Cappellini, Emmegi, Fontana Arte, Paola Lenti, Time & Style and Wästberg. A recent example of their architecture is the K5 Hotel in Tokyo. A 400-page architectural monography was published by Birkhäuser, Basel, in 2020.
