Island

Assembly bench, sofa, table

Armrests are ordered separately.
It is the same armrest for the sofa and the bench. The armrest is mounted with the enclosed wood screws to the middle seat board before the seat is screwed to the frames.

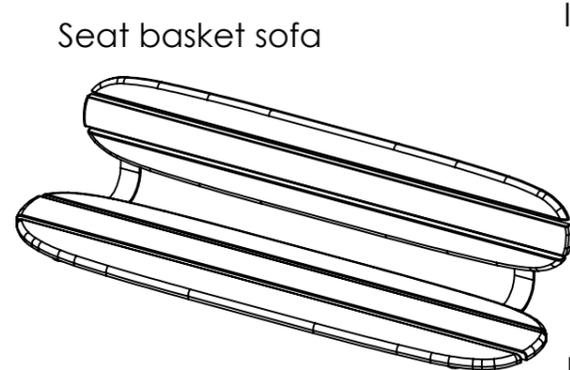

4 x

The sofa is delivered with the seat basket assembled and the stands loose. The same stand is used for the sofa as for the bench. The stands are available with 2 mounting holes.

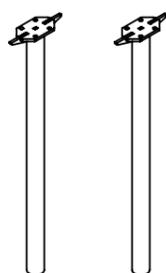

Enter "M" after the article number for stands with extended legs that are cast 400 mm into the ground.
Enter "N" after the article number for stands with a footplate that is bolted to the foundation at ground level.

Each leg is mounted to the seat basket with 4 pcs M8 x 16 + washer.

Constituent parts **U17-53SB**

Constituent parts **U17-53SS**

Constituent parts **U17-53BB**

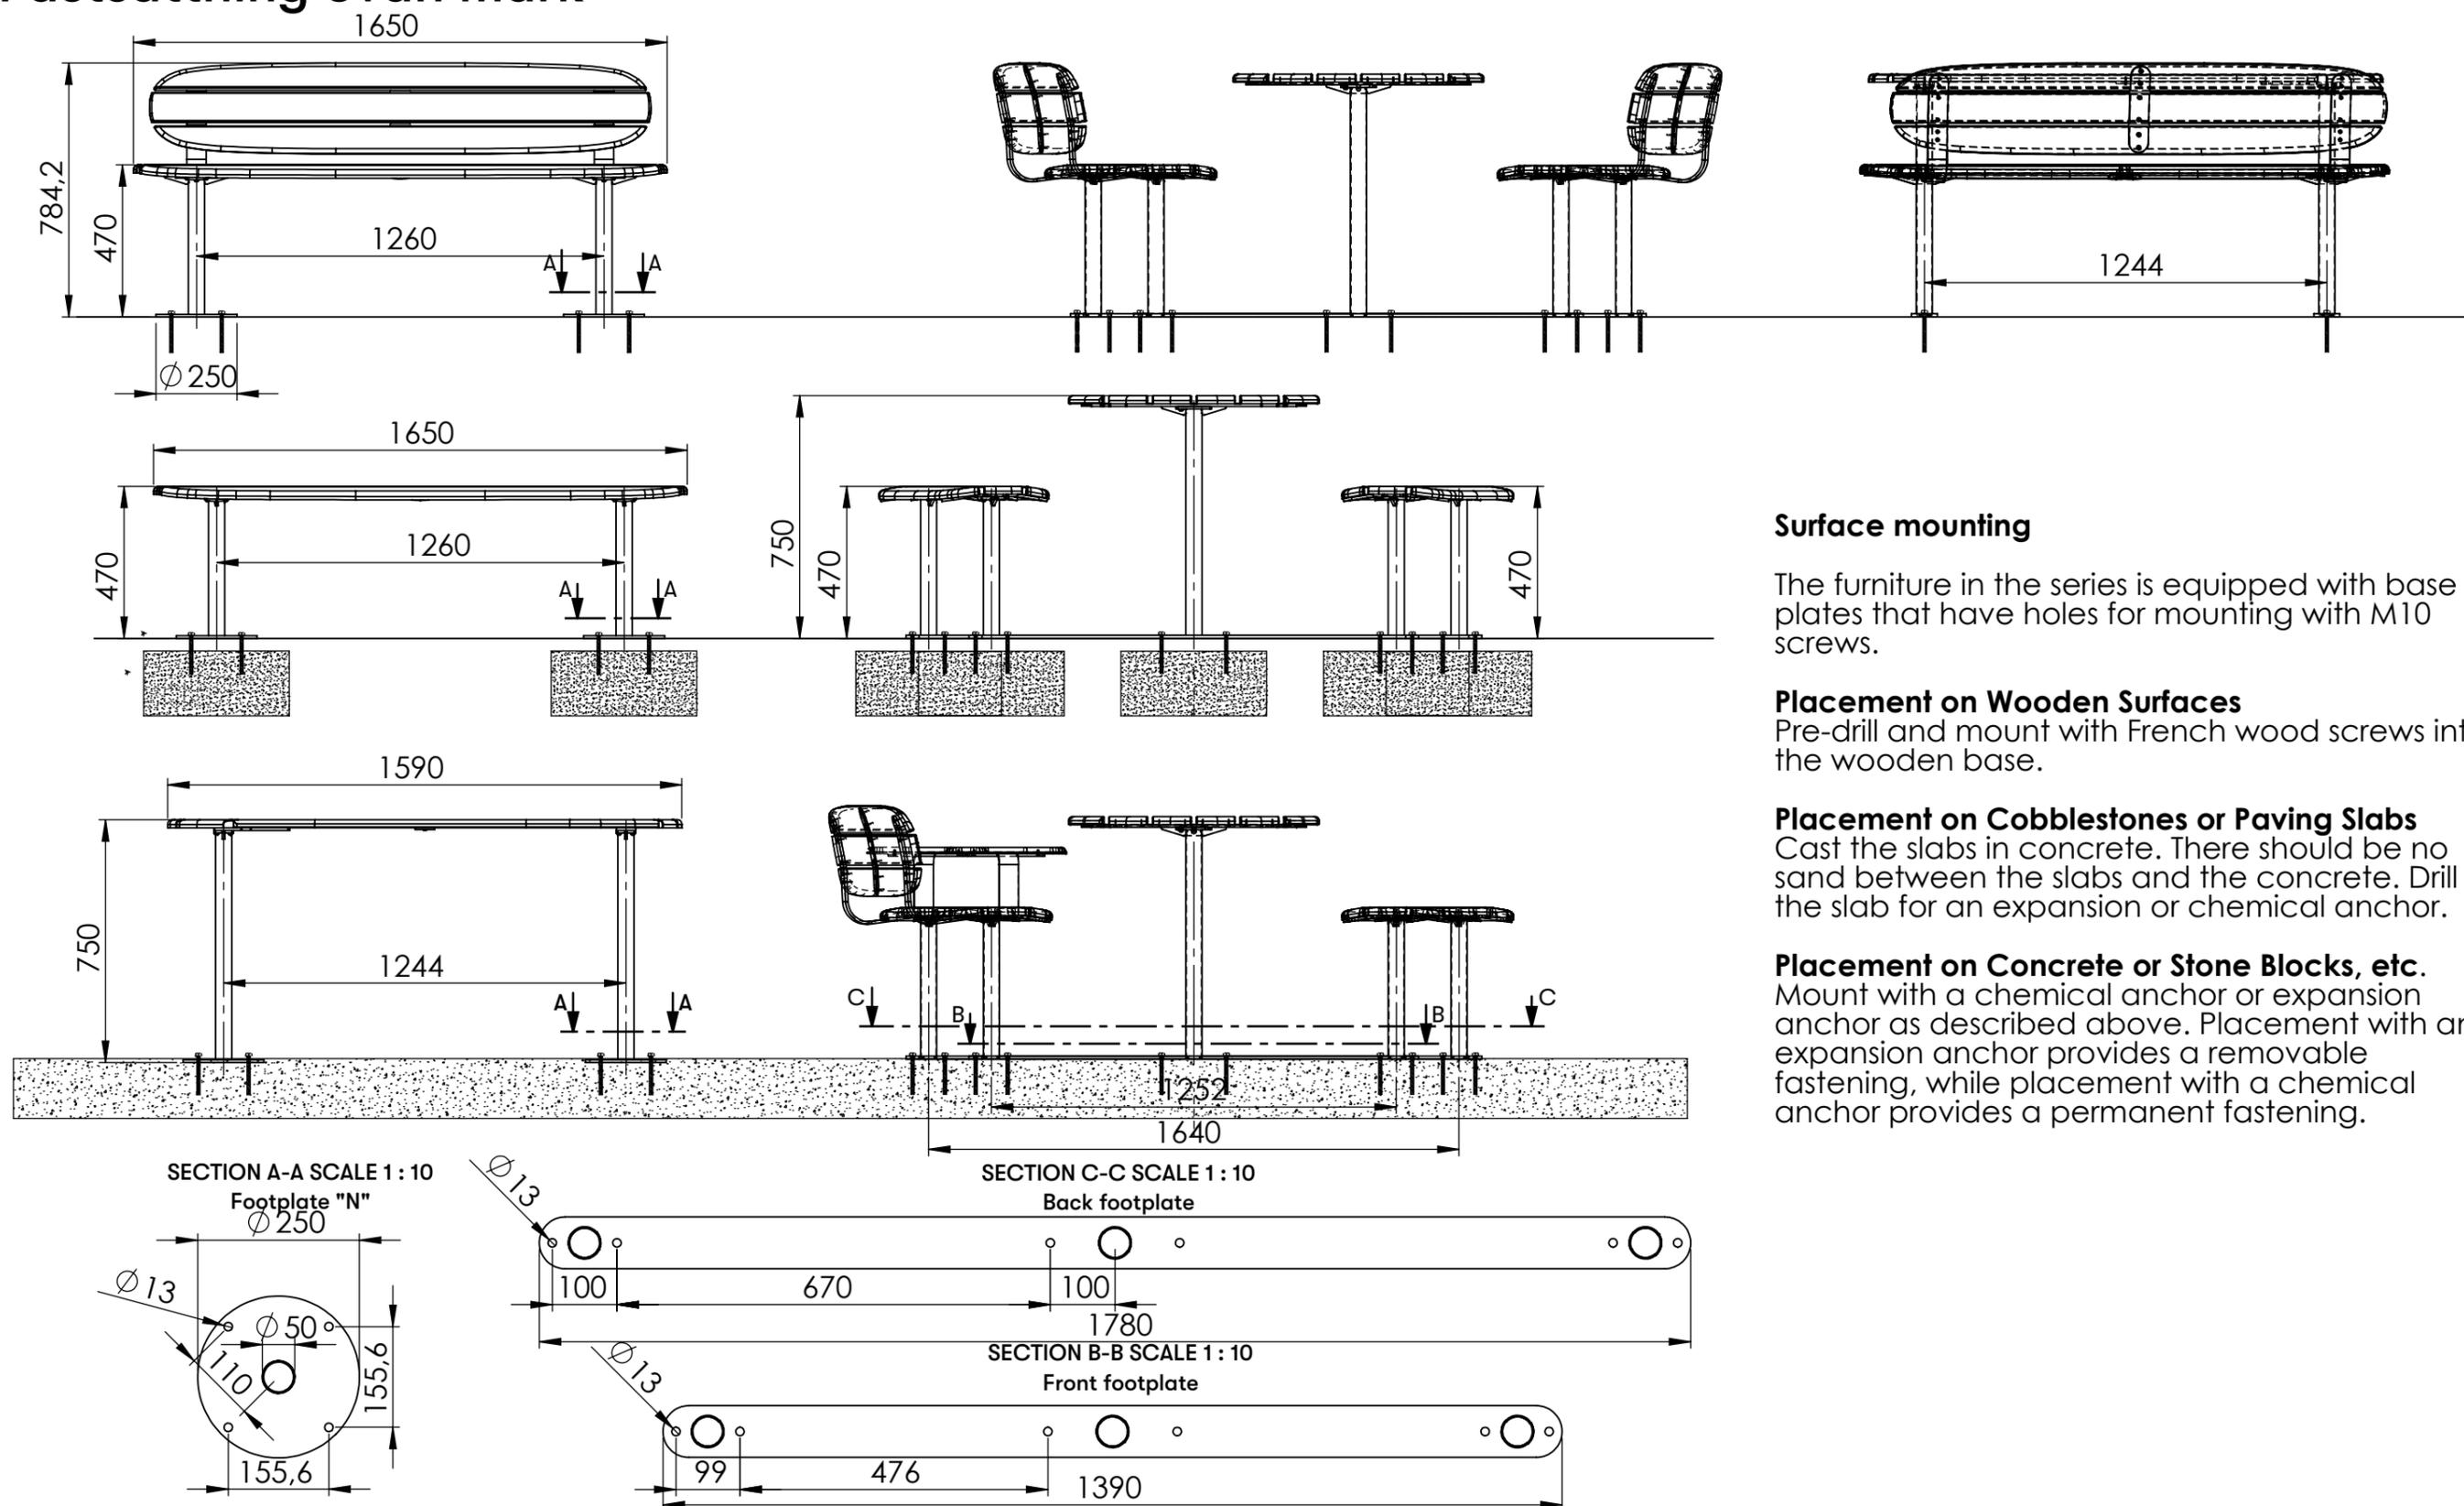

Screw the seats and table top to the frames. Let all screws set before tightening them completely.

Please note that the bench table is only available as a standard attachment, with a foot plate that is bolted to the ground level.

Surface mounting

The furniture in the series is equipped with base plates that have holes for mounting with M10 screws.

Placement on Wooden Surfaces

Pre-drill and mount with French wood screws into the wooden base.

Placement on Cobblestones or Paving Slabs

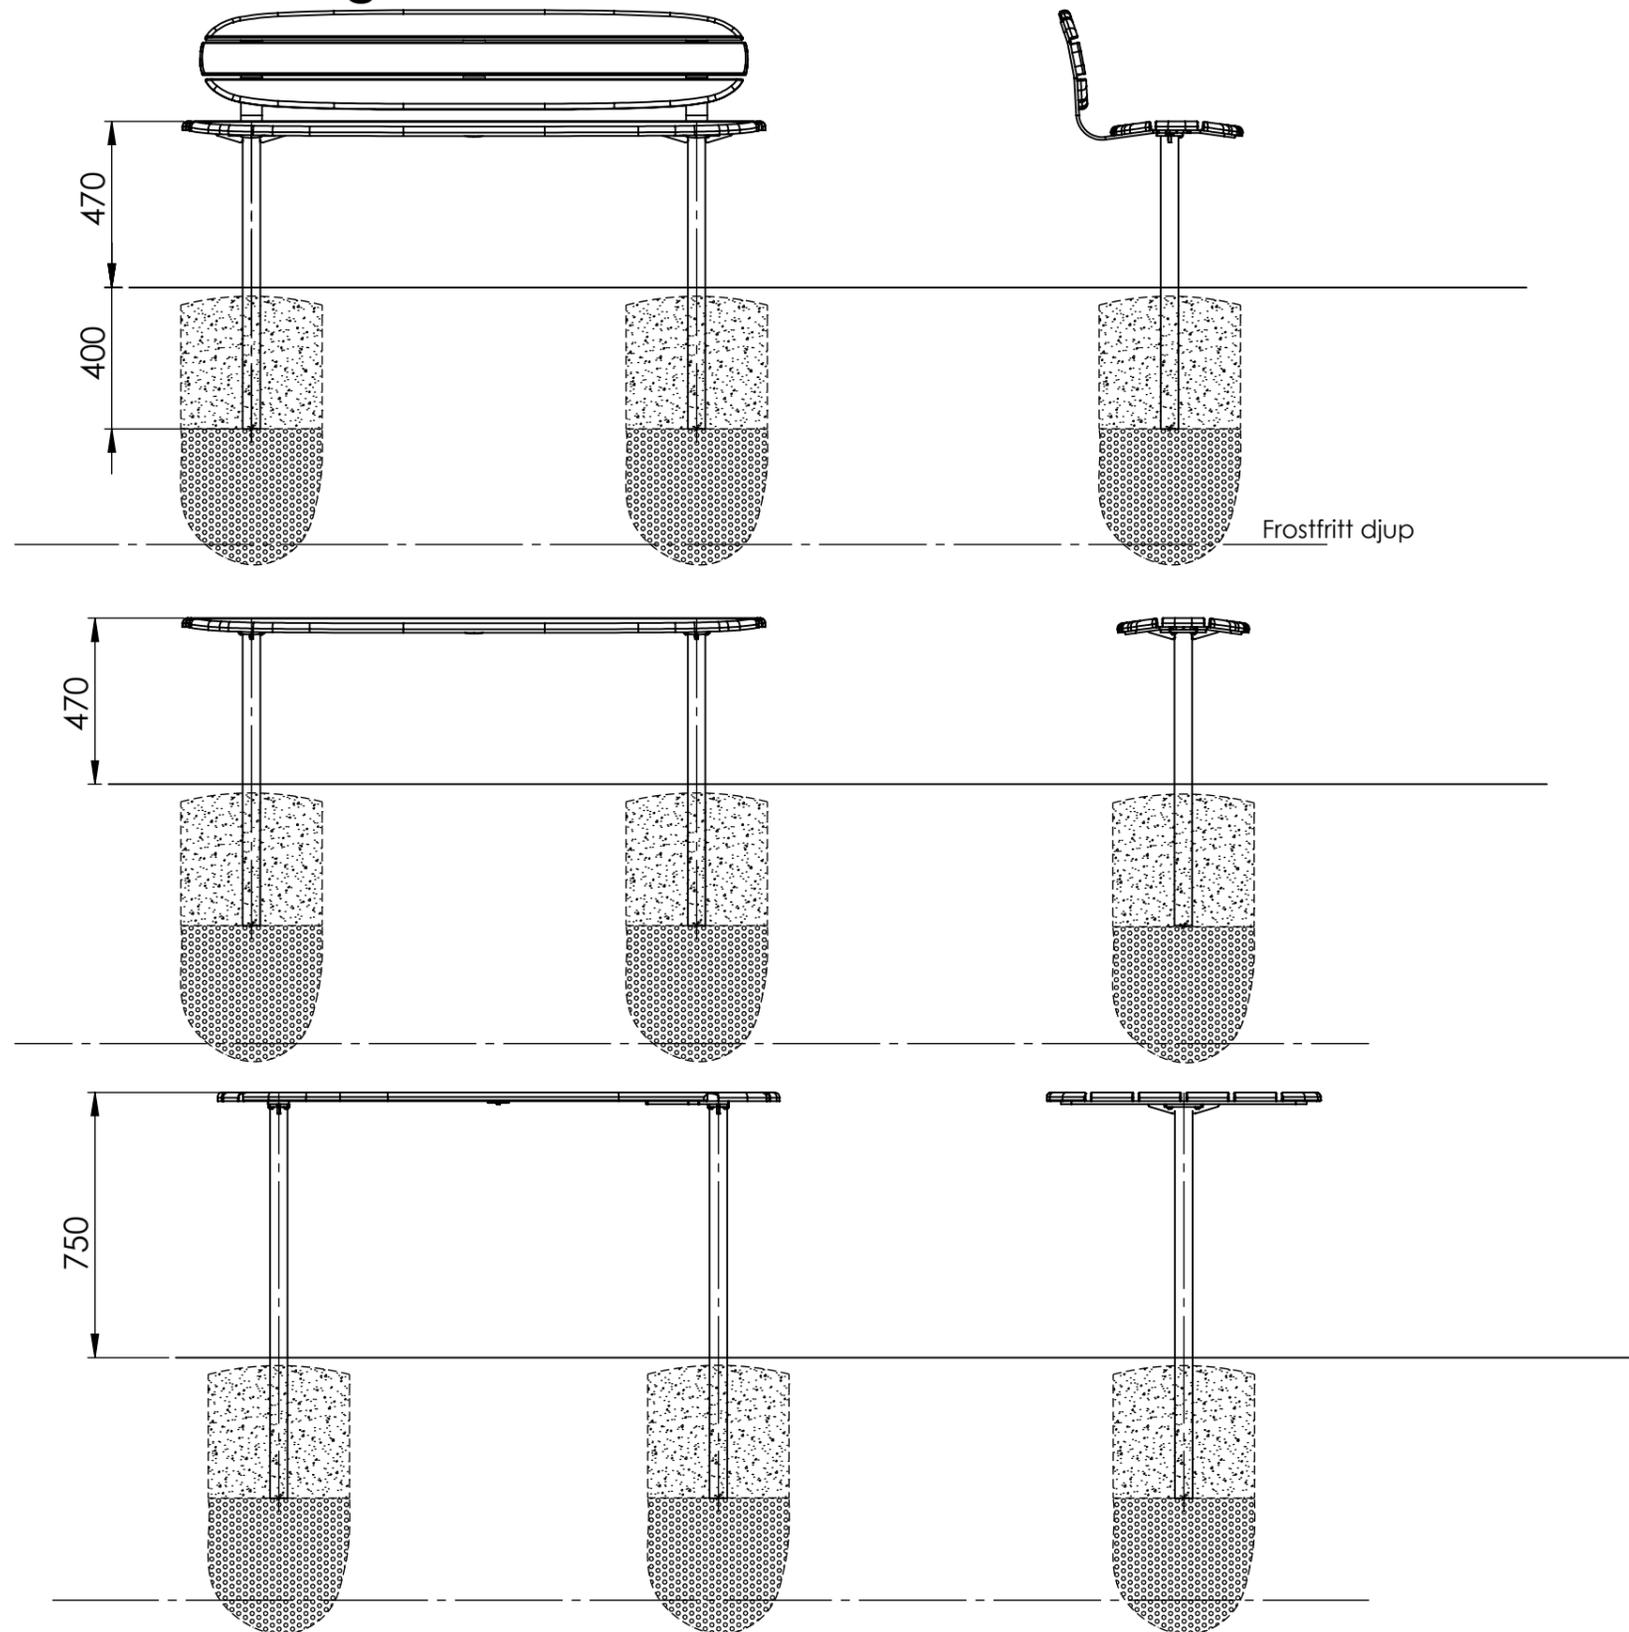

Cast the slabs in concrete. There should be no sand between the slabs and the concrete. Drill the slab for an expansion or chemical anchor.

Placement on Concrete or Stone Blocks, etc.

Mount with a chemical anchor or expansion anchor as described above. Placement with an expansion anchor provides a removable fastening, while placement with a chemical anchor provides a permanent fastening.

In-Ground mounting

Dig a hole for each leg with a diameter of approximately 500 mm. Dig to frost-free depth.

In-Ground Mounting Order

1. Dig a hole for each leg with a diameter of approximately 400 mm. Dig to frost-free depth and add frost-resistant material, so that the depth is approximately 500 mm.
2. Position the furniture with the leg or legs in the dug holes. Support the furniture both vertically and horizontally. Refer to the individual product's information page for the measurement above the ground surface.
3. Cast the leg into the ground with concrete. The concrete should not reach all the way up to the surface, but should stop about 50 mm below the surface.
4. Refill the ground and complete the surface.
