Korg Furniture Group

Thomas Bernstrand

Korg is a versatile furniture collection featuring armchairs, backed benches, bar stools, swing sofas, and round café tables, designed to suit various settings and purposes. Created by Thomas Bernstrand, one of Nola's key collaborators, Korg is defined by clean lines and soft contours that make it adaptable to a range of environments. The collection includes both high and low armchairs, backed benches, bar stools, and café tables in two heights, as well as a modular system for flexible seating arrangements. Crafted from durable steel thread, Korg's seats and backrests allow rain and water to drain effortlessly, preventing marks and making it low-maintenance. Each item is anchored by a sturdy cylindrical support that bolts into the ground, ensuring stability and durability.

Korg Armchair

Thomas Bernstrand

The Korg armchair combines a neat, expressive design with practical functionality. Anchored to a cylindrical base, its grid pattern forms a striking graphic element. Made to be maintenance-free, the armchair's steel construction allows water to drain away easily, making it ideal for outdoor settings.

The armchair is available with a swivel function or firmly anchored.

Korg Table

Thomas Bernstrand

Korg table is a neat round table, anchored in a cylindrical base.

Korg Furniture Group is available in three standard colours: Dark Blue/Grey, Black, and Red/Orange. We're also happy to work with you to create custom colours tailored to your specific project or site needs.

Korg Park Bench

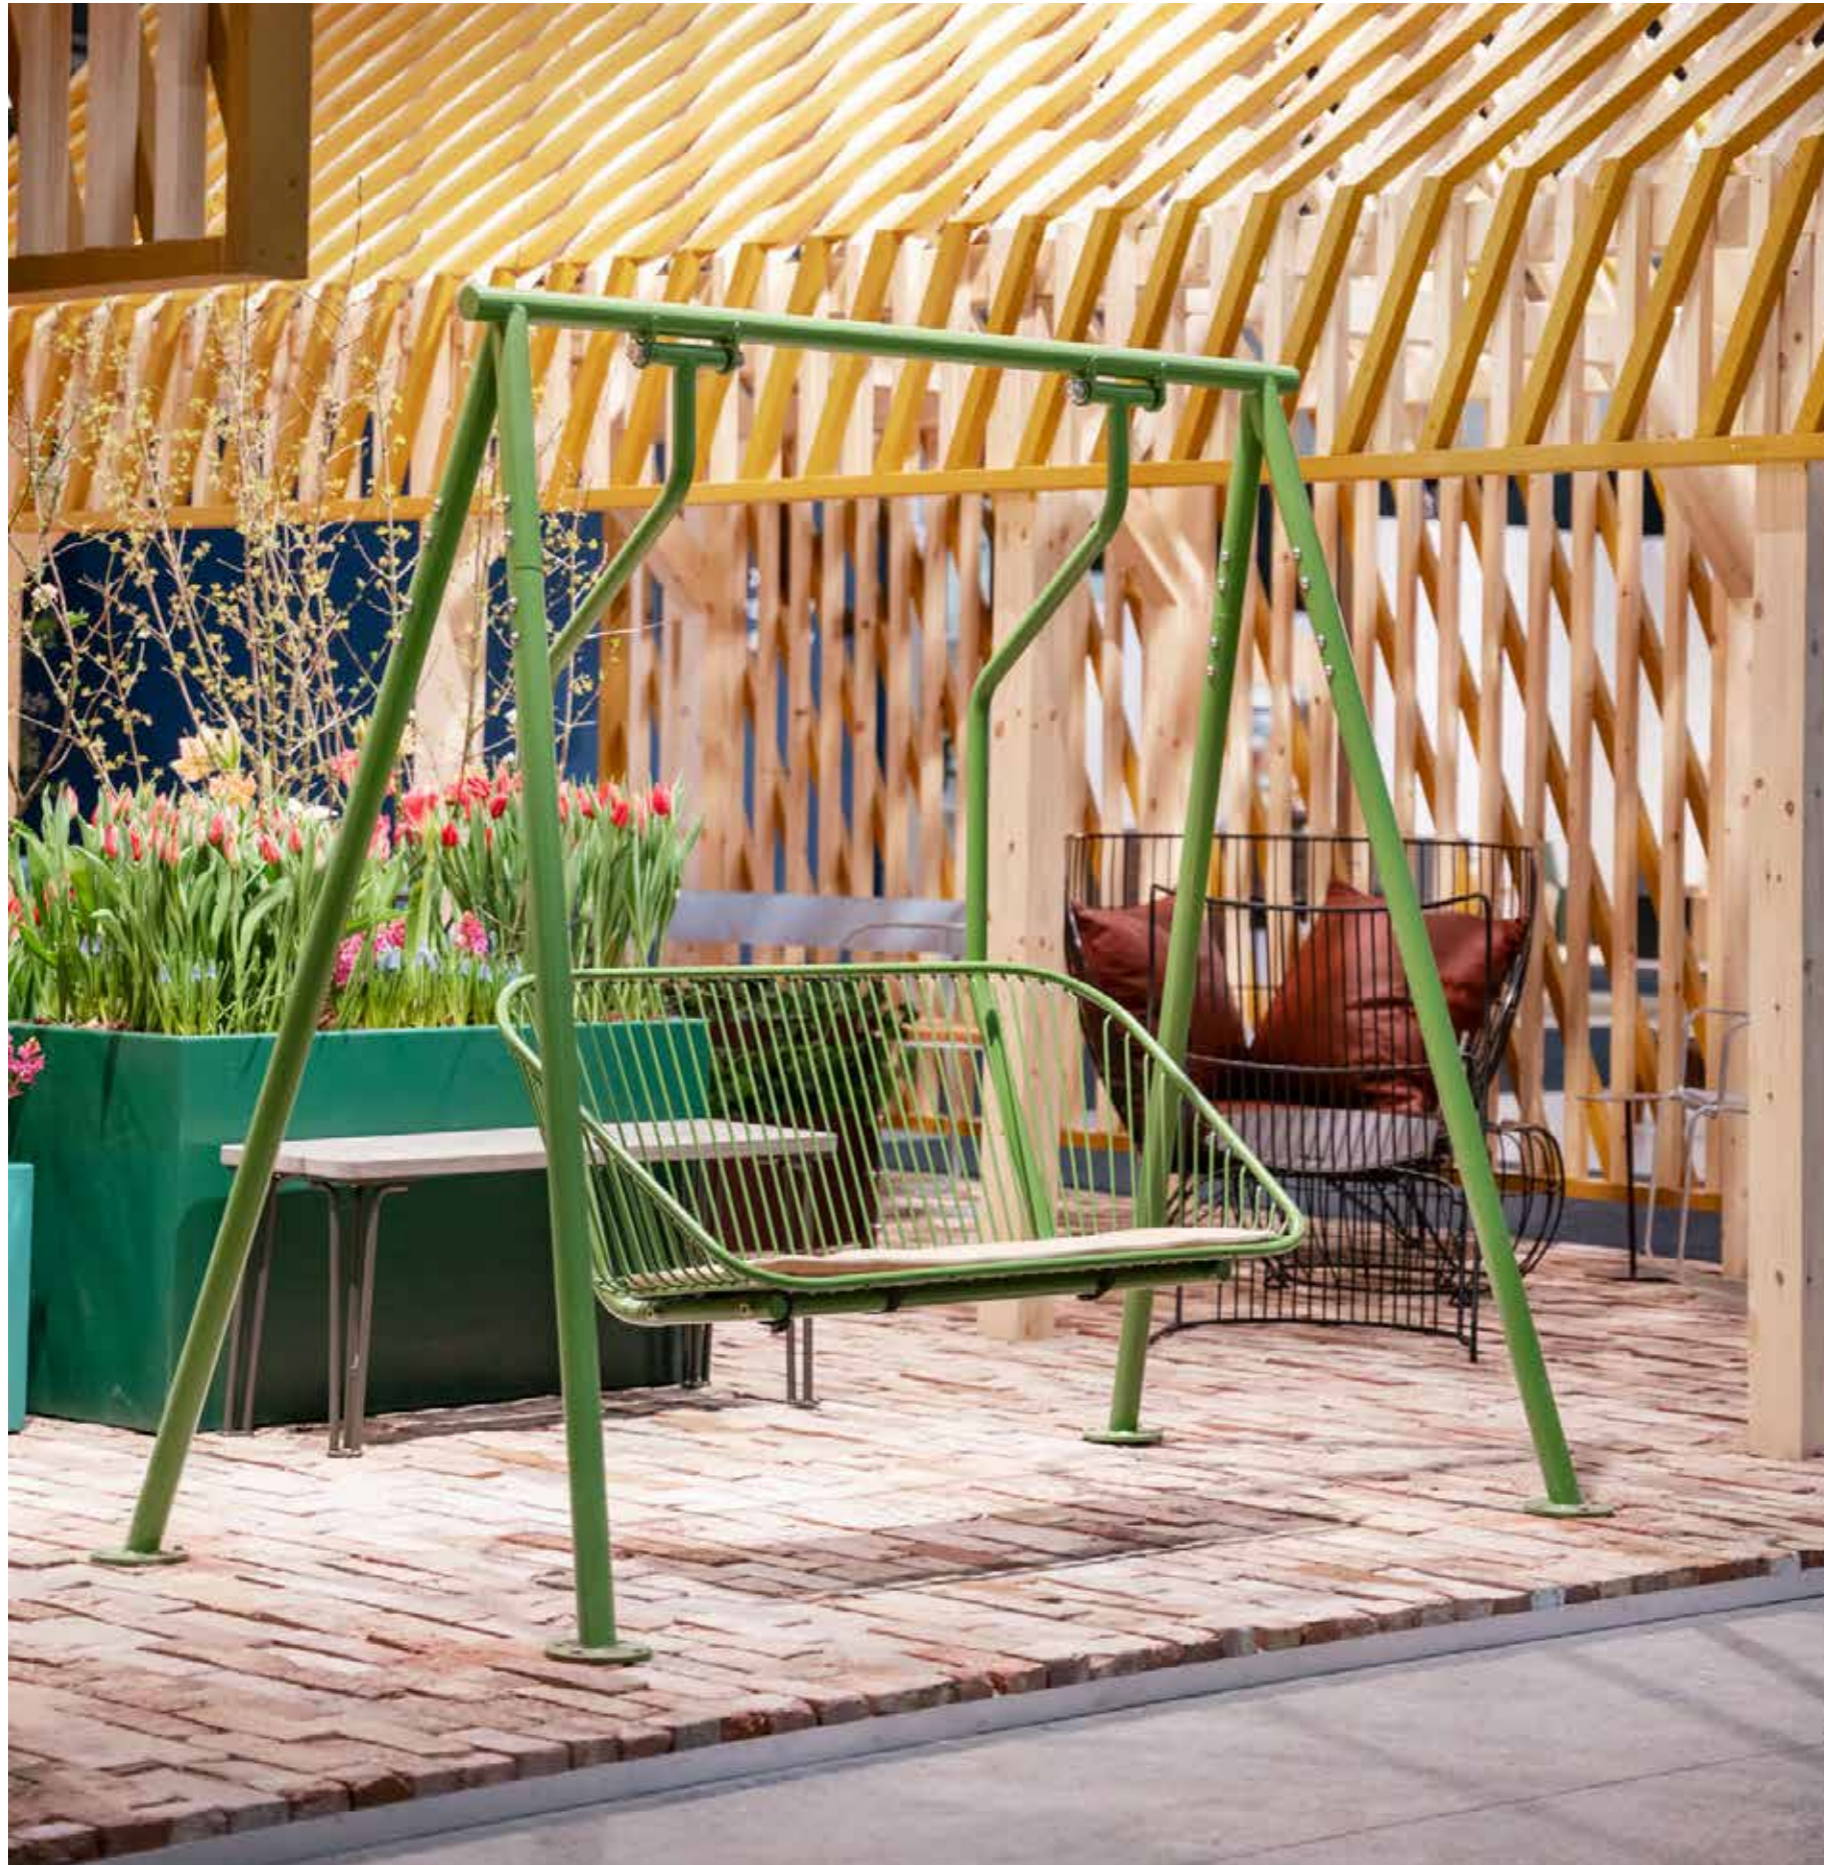

Thomas Bernstrand

The Park Bench is a versatile two-seater, ideal for creating inviting spaces in rows for group settings or as individual seats placed, for example, to capture stunning views. Whether arranged to encourage social interactions or positioned as a cozy spot for two, the Korg Park Bench offers a flexible seating solution for any environment.

The bench can be assembled into several parts and variations, see Korg building system.

Korg Swing Sofa

Thomas Bernstrand

The Korg series is now complete with the addition of a swing sofa, adding a playful yet elegant touch to this versatile furniture family. Suspended from two bars on a sturdy, A-shaped steel frame bolted securely to the ground, the swing sofa combines comfort with durability. Like the other pieces in the Korg series, the sofa's mesh design keeps it low-maintenance and dry, as water easily drains, making it an ideal choice for open outdoor spaces.

The seat and frame can be ordered in different colours for a more varied and playful expression.

Korg Bar Stool and Table

Thomas Bernstrand

The newest addition to the Korg series is the Bar stool and high table, further completing the collection. Sitting at a higher level is increasingly requested in public and outdoor spaces, often suited for work, social gatherings, or events. With this high-seating option, the entire Korg series can be incorporated to create a streamlined and cohesive design, adding both functionality and a confident sense of style.

Korg Modular Furniture System

Thomas Bernstrand

Crafted in the same style as the individual Korg products, this modular furniture system is as flexible as it is versatile. The system is comprised of armchairs, backed benches and modular units. An attachable version was designed for installation outdoors, while a free-standing model has been created for indoor use.

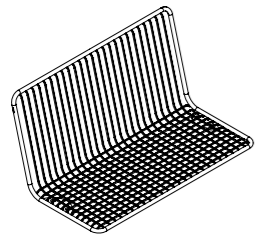

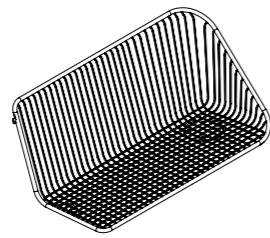

Korg furniture system with feet for free-standing furnishing. Seat cushions upholstered in sustainably-sourced Swedish leather are available for the indoor models. A neat table can be mounted on the armrest.

Korg planner - A digital planning tool

With Korg planner it's possible to test a design idea, customize it according to your own preferences, and to colour, shape and instantly create a simple pdf with the Korg system in a unique design. With the planner, your own ideas can be woven in as early as the drawing stage and be better adapted to site conditions.

"With Korg planner, I hope that more people will have the opportunity to see the true potential of Korg," says Thomas Bernstrand, the designer behind the Korg furniture system. "Many of my furniture designs are flexible and made to fit together in constellations, and to be adapted to the site and given conditions. It will be exciting to see where this leads," concludes Thomas.
