U10-21 Bill Post Community
notice board with lightning

Weight ca: 130 kg

Delivered partially assembled

Bill Post

Attachment to ground

Ritad av Odin Sollie
Ritad datum 2022-11-14

Place pillar in desired location. Mark locations for fasteners, drill holes and mount pillar to the surface. Holes in the base plate are 13 mm in diameter and installation is done using M12 fasteners.

Installation on wood surfaces

Pre-drill and install using wood screws

Installation on stone or concrete pavers

Cast pavers in cement. There should not be leveling sand between the paver and the cement. Drill the paver for expander bolts or chemical anchors. Installation using expander bolts gives a removable attachment, chemical anchors give a permanent attachment.

Installation on concrete

Drill concrete for expander bolts or chemical anchors.

Installation in grass or gravel

Excavate for a concrete foundation. Cast a foundation in a concrete pipe or cardboard tube. The top of the foundation should have a radius. Drill the foundation for expander bolts or chemical anchors.
